## Symbols glossary

	Acquastop: Some Smeg dishwashers are equipped with a simple Acquastop: float sensor in the bottom which is necessary to prevent an accidental leakage of water inside the appliance.		Aquatest measures the clarity of the water during an auto program, and automatically ensures the minimum consumption of water and energy.
	Anti-drip: Some models of dishwashers are equipped with special polymer nozzles anti-drip, that improve the process of drying.		COMM_HEIGHT_86_72dpi
	Delay Timer: The delay timer can postpone the start of the program by up to 24 hours.		Models with new Flexi Fit hinges are able to be installed in kitchens with a plinth of just 5cms. With this new hinge design, the panel has a sliding movement from the bottom to the top, avoiding any possible interference of the panel with the plinth.
	FlexiZone: The ½ load flexizone allows you to wash a reduced load saving energy, water and time and there are no restrictions on where the items are placed.		Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.
	Noise Level: Excellent insulation and special devices keep noise to a minimum.		Orbital wash system distributes water evenly throughout the 60cm dishwasher cavity, directing water with precision to ensure an excellent wash.
	Auto 45°- 65°: The auto programme regulates the length of a cycle depending on the need for a pre-wash and the number of rinses required.		Delicate: Delicate washing program is designed for delicate dishes which are not heavily soiled.
	PRG_RINSE_72dpi		Ultraclean: The Ultraclean option performs a final rinse at a high temperature of 70°C eliminating virtually all bacteria.
	The symbols show the number of plate settings of the dishwasher.		System WaterSave ensures the best washing results with minimal water consumption depending on the model of dishwasher.
	...		...
	...		The Dry Assist + option, in addition to saving energy, ensures perfect drying of the dishes by opening the door automatically at the end of the wash cycle.

## Benefit (TT)

---

### Orbital Wash System

Even water distribution, deep cleaning and low noise thanks to the dual rotating spray arms

Orbital washing system, which, thanks to its double arm, its 7 water exit points and thanks to overlapping and simultaneous rotations and 40 rotations per minute, allows ample coverage of the tank area, thus guaranteeing optimal results in any basket-loading configuration.

### Flexifit hinge system

Smooth-running door for optimal integration into the kitchen design

The height of the plinth can vary from 5 cm to 21.5 cm, allowing it to fit perfectly into the cabinet. Thanks to this solution, the dishwasher blends harmoniously into its surroundings, with the door and plinth perfectly aligned with the other kitchen furniture.

### DryAssist+

The Dry Assist+ system of automatic door opening at the end of the cycle ensures fast and energy-efficient drying
