

Item #: AL4848TT/TB/TBB

Description: AMALIE TABLE GLASS TOP/TABLE BASE (BROWN, BLACK)

Product Size: 48" x 48" x 30"H

Your furniture purchase is an investment. Here are a few tips to maximize the lifetime of your furniture with a minimum amount of effort. Properly caring for your furniture can help ensure that it looks great year after year.

- Wood Furniture Maintenance:
 Awlays dust, wipe, and clean with the grain of the wood.
- Dust with a soft cloth. Dust will scratch the furniture surface if not removed properly.
- Use the same type of polish consistently as interchanging oil-based and wax-based polishes will cause a build-up and result in a foggy or cloudy appearance.
- If a polished surface becomes foggy, rub it with a cloth dipped in a solution of one tablespoon vinegar to one quart of water. Rub softly with the grain until the surface is completely dry.
- Soap and water are not advisable for wood surfaces. Water can penetrate the finish and raise the grain on wood, causing damage.
- Remember to change dusting cloths frequently as dirty cloths may scratch your furniture's surface.

The Enemies of Wood:

- Moisture is wood's worst enemy. Liquid spills should be gently wiped up immediately. Coasters should be used under all beverages.
- Do not allow rubber or vinyl materials to lie on the furniture Chemicals in rubber may leave a stain. Put a strip of felt or leather under accessories that have rubber or vinyl.
- Heat creates a chemical change in the furniture's finish, which results in a white spot. Use protective pads under hot dishes, appliances, etc.
- Sunlight's ultraviolet rays can damage the finish of furniture. Do not place furniture directly against a heater or radiator and do not place in the path of hot streams of air from central heating. This will cause extreme localized drying of the wood

High Gloss Resin Table Maintenance:

- Resin tabletops have approximately 1/8" of a resin coat on the top face of the table, which will resist ice, water, wine, liquor, food, cleaning fluids, and warm or hot liquids; however, cups, glasses, etc. containing hot liquids should not be left on the table without a coaster for protection.
- Resin tabletops will scratch just the same as any other glossy surface and basic precautions should be taken.
- For lasting shine, the resin table should be waxed with a car wax that does not contain silicon. Maintaining this wax build-up will
- result in a high gloss shine.
 When wiping down the table, a soft, clean rag should be used. Do not use a heavy paper.

Granite Top Maintenance:

The surface of the granite on your table has been polished or sealed to create a generally non-porous surface. The stone has many natural characteristics including: veining, hairline cracks, and color variations - which make up the stone's

- beauty.

 To maintain the beauty of your granite:
 Protect surfaces from scratching, staining and etching by:
- * Keeping them free of debris or sharp objects
- * Wiping up spills immediately
- * Avoiding contact with chemicals (particularly acid-based materials)
- Clean with pH neutral products or those especially formulated for use on stone.
- It is not recommended to use a water-based solvent for dark granite as it will remove the polish from the surface.
- After a period of use, apply a penetrating sealer to prevent contaminants from being absorbed into the stone.
- Remove stains with special absorbent poultices formulated for use on stone
- Renew the surface on polished granite (granite with a high gloss surface by buffing with special stone polish, powder or cream.

Do not use granite polish on granite with a matte finish, which has been honed rather than polished. (Penetrating sealer may be used on both polished and honed

Marble Top Maintenance:

Marble may be stone, but it is porous stone and can stain easily. Treating marble surfaces the same as wood surfaces is a great rule of thumb.

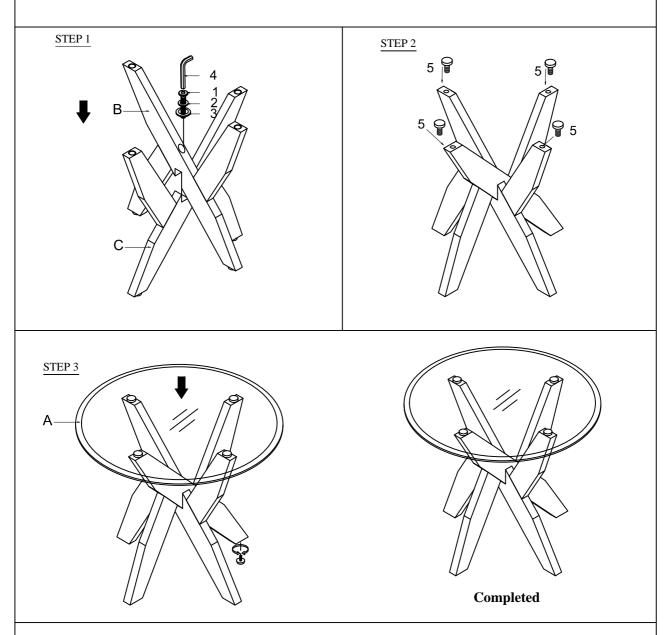

- It is recommended to seal the tops on a regular basis (every 6 to 12 months). A good quality stone sealer can be purchased from any tiles/stone store or any homecare store and should be applied according to the manufacturer's recommendation.
- When sealed properly, marble tops can be used indoors and outdoors and can withstand any weather conditions except internal freezing. Snow or freezing rain will penetrate the table and cause cracks.

Caring for the Fabric on Upholstered Furniture:

- Frequent vacuuming of the entire upholstered area will prevent dust from settling into the fibers.
- Professional cleaning is always recommended for all upholstered pieces.
 Always pre-test a small area of fabric in an inconspicuous area when cleaning
- before proceeding.
- Do not use cleaning products containing brightening agents.

AL4848TT/AL4848TB/AL4848TBB ASSEMBLY INSTRUCTIONS

Step 1: Attach Lower Leg (B) to Upper Leg (C) by inserting Flat Washer (3), Spring Washer (2), Bolt (1) into the holes at the bottom of the Lower Leg (B). Tighten Bolt (1) with Allen Key (4). Do not fully tighten.

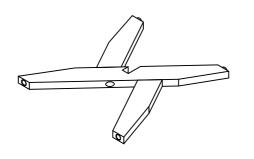

- **Step 2:** Turn the table base to upright position on flat surface and attach Mounting Plate (5) into holes on the each legs top.
- **Step 3:** Place Glass Top (A) on the table base and adjust table leg levelers until level and table does not wobble. Fully tighten Bolt (1) with Allen Key (4). Assembly product is now completed.

Description: AMALIE SIDE CHAIR GRAY

Product Size: 19.25"x 23.5"x 36"H

Your furniture purchase is an investment. Furniture can last life times, with a minimum amount of effort. Here are a few tips to properly care for your furniture, ensuring that it looks great year after year.

Wood Furniture Maintenance:

- -Always dust, wipe, and clean with the grain of the wood. -Dust with a soft cloth. Dust will scratch the furniture surface if not removed properly.
- -Use the same type of polish consistently as interchanging oil-based and wax-based polishes will cause a build-up and result in a foggy or cloudy appearance.
- -If a polished surface become foggy, rub it with a cloth dipped in a solution of one tablespoon vinegar to one quart of water.

Rub softly with the grain until the surface is completely dry.

- -Soap and water are not advisable for wood surfaces. Water can penetrate the finish and raise the grain on wood, causing damage.
- -Remember to change dusting cloths frequently as dirty cloths may scratch your funiture's surface .

The Enemies of Wood:

- -Moisture is wood's worst enemy. Liquid spills should be gently wiped up immediately. Coasters should be used under all beverages.
- -Do not allow rubber or vinyl materials to lie on the furniture. Chemicals in rubber may leave a stain. Put a strip of felt or leather under accessories that have rubber or vinyl.
- -Heat creates a chemical change in the furniture's finish, which results in a white spor. Use protective pads under hot dishes,
- -Sunlight's ultraviolet rays can damage the finish of furniture. Do not place furniture directly against heater or radiator and do not place in the path of hot streams of air from central heating This will cause extreme localized drying of the wood.

High Gloss Resin Table Maintenance:

- -Resin tabletops have approximately 1/8" of a resin coat on the top Snow or freezing rain will penetrate the table and cause cracks. face of the table, which will resist ice, water, wine, liquor, food, cleaning fluids, and warm or hot liquids; however, cups, glasses, etc, containing hot liquids should not be left on the table without a coaster for protection.
- -Resin tabletops will scratch just the same as any other glossy surface and basic precautions should be taken.
- For lasting shine, the resin should be waxed with a car wax the does not contain silicon. Maintaining this wax buid-up will result in a high glosss shine.
- -When wiping down the table, a soft, clean rag should be used. Do not use a heavy paper.

Granite Top Maintenance:

The surface of granite on your table has been polished or sealed to creat a generally non-porous surface. The stone has many natural characteristics including: veining, hairline cracks, and color variationswhich make up the stone's beauty.

To maintain the beauty of your granite:

- Protect surfaces from scratching, staining and etching by
 - *Keeping them free of debris or sharp objects.
 - *Wiping up spills immediately.
 - *Avoiding contact with chemicals (paricularty acid -based materials)
- -Clean with pH neutral products or those especially formulated for use on stone.
- -It is not recommended to use a water based solvent for dark granite as it remove the polish from the surface.
- After a period of use, apply a penetrating sealer to prevent contaminants from being absorbed into the stone.
- -Remove stains with special absorbent poultices formulated for use on stone.
- -Renew the surface on polished granite (granite with a high gloss surface) by buffing with special stone polish, powder or cream.

Do not use granite polish on granite with a matte finish, which has been honed rather than polished. (Penetreting sealer may be used on both polished and honed grannite).

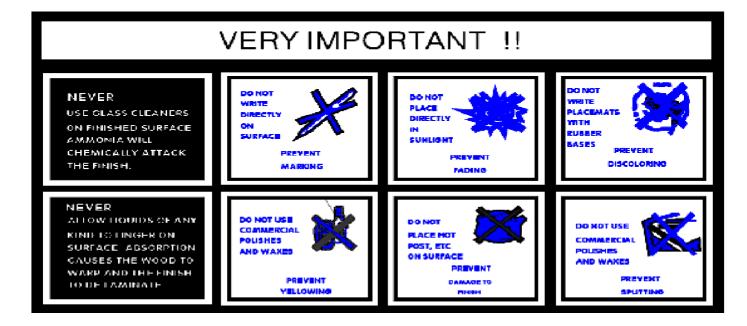

Marble Top Maitenance:

Marble may be stone, but it is porous stone and can stain easily. Treating mardle surfaces the same as wood surfaces is a great rule of thumb.

- -It is recommended to seal the tops on a regular basis (every 6 to 12 months) A good quality stone sealer can be purchased from any tiles/stone store or any homecare store and should be applied according to the
- manufacture's recommendation. -When sealed properly, marble tops can be used indoors and outdoors and can withstand any weather conditions except internal freezing.

Caring for the Fabric on Upholstered Funiture:

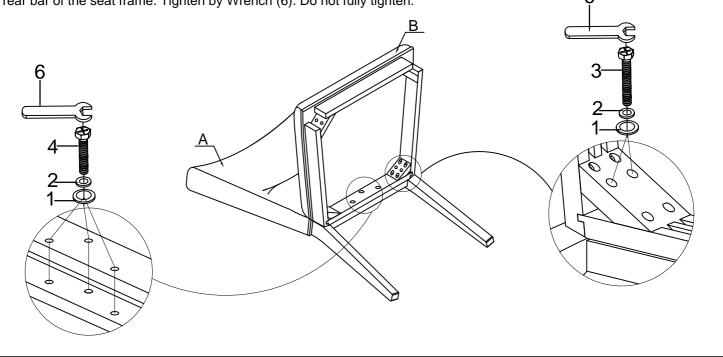

- -Frequent vacuuming of the entire uphostered area will prevent dust from settling in to the fibers.
- -Professional cleaning is aways recomended for all upholstered pieces.
- -Always pre -test a small area of fabric in a inconspicuous area when cleaning before proceeding.
- -Do not use cleaning products containing brightenning agents.

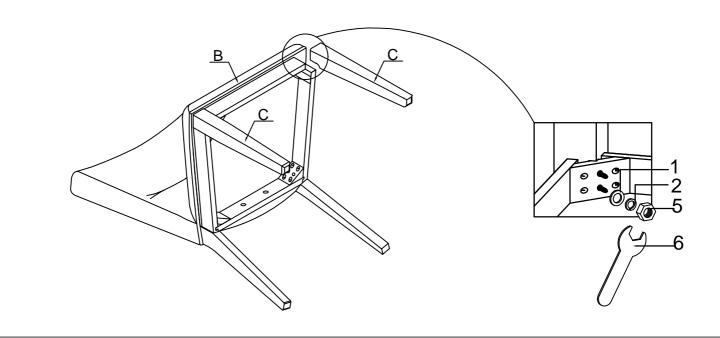

AL4848SG ASSEMBLY INSTRUCTIONS

DO NOT FULLY TIGHTEN BOLTS AND SCREWS UNTIL THE ENTIRE ITEM IS COMPLETELY ASSEMBLED

STEP 1: Turn the Chair Back (A) on the floor with a piece of cloth or carpet underneath to prevent finish from scratching. Attach Seat Box w/ Seat Cushion (B) to the Chair Back (A) by using Long Bolt (3), Flat Washer (2), Spring Washer(1) into the holes at the corner block of the Seat Box w/Seat Cushion (B), insert Short Bolt (4), Flat Washer (2), Spring Washer (1) into the rear bar of the seat frame. Tighten by Wrench (6). Do not fully tighten.

STEP 2: Attach Front Leg (C) to the Seat Box W/ Cushion Seat (B) by using Spring Washer (1), Flat Washer (2), Hex Nut (5) and secure by Wrench (6). Fully tighten all bolts at this time, turn over the chair. Assembly product is now completed.

MADE IN VIET NAM

Steve Silver Company Dining Chairs- **Assembly Troubleshooting Guide**

The most important element of correct chair assembly is to tighten the bolts as directed. Prematurely tightening the bolts can lead to numerous issues and will lengthen the assembly time. Listed below are the most common issues in chair assembly and their easy solutions.

PROBLEM: Chair is unlevel.

Cause 1:

Unlevel chairs can occur if the bolts are fully tightened before all bolts are attached. There is a variance in the alignment of this chair to allow the chair to be assembled more easily.

Solution:

Loosen each bolt in the seat box (front legs, back corner blocks and back apron) until they are finger tight. Place the chair upright on the floor. Sit in the chair for about 30 seconds. Carefully turn the chair upside down and tighten each bolt. The chair will now be level.

Cause 2:

Unlevel chairs can occur if one or more of the floor glides are missing from the bottom of the chair leg.

Solution:

Request a set of floor glides from the e-mail address below.

AR@ssilver.com

PROBLEM: Bolts do not fit properly.

Cause:

This issue can occur when the bolts are tightened fully before all bolts are attached. There is a variance in the alignment of the bolts to allow the chair to be assembled more easily. Tightening the bolts prematurely can cause the holes for the other bolts to become slightly misaligned, causing the remaining bolts not to fit properly.

Solution:

Make sure each bolt in the seat box (front legs, back corner blocks and back apron) is loosened until finger tight. This will allow you to realign the holes, and the bolts will now fit properly.
