Bronte Reclaimed Wood Sculpture

A wheel of reclaimed wood, worn into something elemental. The circular form with a hole at its center has an ancient, wheel-like presence, while reclaimed wood gives the Bronte sculpture a history you can read right in the grain. Natural cracks, fissures, and grain developed over years bring an authenticity no new material can copy, set on a simple iron base that lets the disc stand tall. No two will ever match — and that is the whole point.

- Elemental Disc: A circular form pierced through the center carries an ancient, wheel-like presence, giving the piece a primal, sculptural weight on a shelf or console.
- Reclaimed Wood: Solid reclaimed wood brings cracks, fissures, and grain developed over years, lending a history and authenticity that new materials simply cannot copy.
- Iron Base: A simple iron base grounds the disc and holds it upright, keeping the focus on the wood while adding quiet contrast in material and tone.
- One Of A Kind: Natural cracking and grain mean no two pieces ever look the same, so each sculpture arrives with its own character and pattern.
