

Conner Small Mirror

DM110S

Availability: In Stock

DESCRIPTION

Our Conner Small mirror doesn't shy away from ornamentation: the arcing and barbed outer bands of metal that flow around the inset antique mirror are commanding in their complexity. The intricacy of its personality makes the Conner a masterful choice for a wall that serves as a focal point when the modus operandi is to impress everyone who walks into a room. The gold leaf finish on the frame is the final flourish in the mirror's repertoire. We also offer the Conner in a large version.
