

PRODUCT SPEC SHEET

Coleman / RV-401BBQ

Coleman Revolution 4 Burner BBQ Grill 680 Sq In Cooking Surface

The Coleman Revolution 4-Burner Barbecue Grill is the new standard for outdoor cooking. The Weatherproof Instastart matchless push-button lighting system gets you started quickly, no matter the season or weather. One 13,000 BTU side stove burner is great for preparing a side dish, sauce, and soup. Flare-Free Technology captures and removes more grease, eliminating flare-ups and ensuring evenly cooked food without drying or burning. Four stainless steel grill burners deliver up to 50,000 BTUs of grilling power - perfect for burgers, sausages, chicken, ribs, and steaks. Double-stacked cooking grates with grease channels fit up to 25 burgers on 500 square inches of cooking space, while the warming rack provides 180 square inches. The flare-free grates offer double the heat retention while capturing and redirecting all fats to the front grease channel and into the removable front grease cup, making cleanup a breeze. The compact cart includes 4 caster wheels, hidden propane tank storage, and 1 side shelf for a convenient workspace. For those who wish to convert their outdoor BBQ grill from propane to natural gas, the Convertible Valve System makes it quick and easy (conversion kit sold separately). Challenge what you know about outdoor grilling with Coleman Revolution.
