XTR-SSA5

Introducing the **Mythos® XTR® SSA Series Loudspeakers**

Definitive Technology answered the need for ultra-shallow high-performance loudspeakers to match the latest ultra-thin TVs with the critically acclaimed Mythos XTR Series speakers. Their slim profile, clean modern styling and sound quality equivalent to full-size speakers made the XTR series an instant hit with audio critics and home theater enthusiasts. Now Definitive offers two Mythos ultra-slim single-speaker solutions—the five-channel XTR-SSA5 and the three-channel XTR-SSA3.

XTR-SSA5: The Perfectly Thin Surround Solution

If you want all the thrills of five-channel surround sound without the need for separate rear speakers, Definitive Technology has the solution: the XTR-SSA5. The SSA5 incorporates Solo Surround Array (SSA), a patented technology that optimizes the spatial presentation of five channels to create the

illusion that you are surrounded by five separate high-performance speakers. Enjoying a superb sounding audiophile-grade surround experience has never been more convenient. Simply connect an SSA5 to any multi-channel receiver and powered subwoofer to enjoy enveloping surround sound without the bother of running wires and finding locations for rear speakers.

SSA technology uses complex directional cues to completely free the sound from the box and convince your ears and brain that you are surrounded by great sounding Definitive loudspeakers. Since SSA does not depend on bouncing sound off walls, it works in virtually any room and setup configuration. With SSA5 technology, you'll get big, lifelike three-dimensional imaging from all multi-channel sources.

SSA Surround technology wraps you in rich, involving surround sound from just one convenient speaker

MYTHOS XTR SSA SERIES

XTR-SSA3: The Perfectly Thin L/C/R Solution

For those listeners who prefer to use discreet surround speakers or forgo rear channel speakers entirely, Definitive offers the innovative XTR-SSA3. Simply connect an SSA3 to the left, center and right speaker outputs of any multi-channel receiver for high-performance front-stage reproduction from a single stylish, compact and convenient speaker. The left and right channel arrays of the SSA3 utilize patented SSA technology to vastly widen the stereo image to lifelike proportions. You'll enjoy a sonic image that is as wide as the wall with incredible three-dimensionality. For complete surround sound enjoyment, mate the XTR-SSA3 with matching Mythos XTR-20BP surround speakers or any of Definitive's in-wall or in-ceiling speaker solutions.

Superior Definitive Monocoque Aluminum Enclosure

Like the entire Mythos Series, the SSA models are fabricated from aircraft-grade extruded aluminum styled to perfectly match today's ultra-shallow flat panel TVs. The gloss black finish has been hand-polished to a beautiful pearlescent sheen.

Ultimate Placement Versatility

The SSAs come supplied with everything you need to place them wherever you want to use them—they can be mounted to either a wall or a TV bracket accessory speaker arm with the supplied wall-mount bracket. For shelf-mounting in front of or below the TV, the SSA models come with clever adjustable shelf support feet that can raise the speaker over the TV's protruding shelf stand.

>>>> Add the incredibly compact yet powerful SuperCube 2000 powered subwoofer to your XTR-SSA for the ultimate in performance.

The Mythos XTR-20BP <<<< bipolar surround speaker is the perfect surround speaker for the XTR-SSA3.
