

CSA-PWS-TBLOCK-3

Terminal Block for CSA-PWS10S-HUB-ENET & CAEN-2X1, US/NA

The CSA-PWS-TBLOCK is a terminal block accessory that is required when installing one or more **CSA-PWS10S-HUB-ENET** shade power supplies in a **CAEN** automation enclosure. Two models are offered: Model CSA-PWS-TBLOCK-2 supports up to two power supplies installed in a CAEN-1X1 enclosure, and model CSA-PWS-TBLOCK-3 supports up to three power supplies installed in a CAEN-2X1 enclosure.

A CSA-PWS-TBLOCK is used to terminate the Class 1 single-phase AC line power wiring that feeds the power supplies. It mounts within the enclosure along with the power supplies, and features a color-coded DIN rail design with printed label strip and mounting hardware for a clean and simple installation. Line cords are included, which provide flying leads on one end to connect to the terminal block, and inline IEC 60320 C13 outlets on the other end to mate with the inline C14 inlets on each power supply.

CSA-PWS-TBLOCK terminal blocks are color-coded per NEC for use in the US, Canada, and other countries.
