

SourcePoint 8

Available in Black, Walnut, or White Finish

The SourcePoint 8 is a near identical version of the SourcePoint 10, but in a smaller package.

"My goal for the SourcePoint 8 was to take the technologies and sound character of the SourcePoint 10 and make them available in a smaller and more affordable package. It retains the long-standing technologies that I am known for with new twists and concepts that further improve performance."

-Andrew Jones
