Outdoor Metal

Behind the Design

Durable and versatile, metal brings resiliency and a distinct edge to pieces, whether indoors or out. Even better — it pairs effortlessly with a mix of materials.

Care Instructions

- Address spills immediately by wiping with a dry, soft cloth.
- Dust regularly with a soft, damp cloth, followed by a dry one.
- Avoid use of cleaning products with acid, vinegar, lemon, and ammonia, as abrasive ingredients can damage surface.
- Metal surfaces are not scratch- or heat-resistant and may scuff or stain without proper care. To maintain material's natural appearance, avoid sharp objects on surfaces. Use coasters, trivets and placemats for protection against hot or wet items.
- Cover or store indoors during inclement weather and when not in use.
