### DLA-X900RKT Key Features

Selected parts and matched devices are at the heart of the DLA-X900R. Factory technicians ensure that the components used are optimized for each unit - producing images of exquisite quality and the industry's highest native contrast ratio of 150,000:1. JVC's exclusive 4K e-shift3 combined with the three DILA devices produces a flicker free image with 3840x2160 resolution on-screen. The 4K enabled HDMI inputs will accept 4k 60P source material, and the built in up-conversion system will convert 1080P content into 4K. For 2014, JVC added an Intelligent Lens Aperture which results in a Dynamic Contrast Ratio of 1,500,000:1. The DLA-X900R is the pinnacle of performance in projection.
