# SONY

#### VPL-VW285ES

#### **4K HDR Home Theater Projector**

- Full 4K resolution with 4096 x 2160 pixels
- Three SXRD™ imagers for full color brightness
- Advanced Reality Creation for upscaling and sharpening images without sharpening picture noise2
- High brightness of 1,500 Lumens
- Enjoy High Dynamic Range (HDR) content in various formats
- View clear sharp images with Motionflow<sup>™</sup> technology
- Enjoy gaming and other types of content in 4K HDR
- Enjoy the latest 4K content services with HDCP 2.2 compatibility on both HDMI inputs4
- TRILUMINOS™ Display for wider array of rich colors
- Long lasting lamp up to 6,000 hours suggested replacement

#### **Features**

#### Native 4K resolution for lifelike pictures.

With more than four times the resolution of Full HD, <sup>1</sup> native 4K offers 8.8 million pixels (4096 x 2160) for a picture that's so incredibly lifelike, it's like looking at the real thing.

## **SXRD™** Imagers times 3

Separate imagers for Red, Green and Blue channels give you all 8.8 million pixels in full, rich color at every instant

#### **HDR Compatible**

Take full advantage of the latest content produced with HDR (High Dynamic Range) for extremely wide contrast range with an even higher range of brightness levels and volume of colors.

#### **High brightness and contrast**

With an impressive 1,500 lumens brightness and spectacular contrast, 4K images are clear with bright highlights and rich, deep blacks – even in well-lit rooms.

### Reality Creation upscales your favorites.<sup>2</sup>

Upscale your existing Blu-ray Disc™ and DVD movies to near 4K quality.² The super-resolution Reality Creation 4K upscaler analyzes every pixel in any direction, then employs a digital signal processing

algorithm to map pixels against an ever-evolving picture patterning database, compiled from over 10 years of expertise, to enhance colors, contrast, and textures without enhancing image artifacts.<sup>2</sup>

## Action stays smooth and sharp with MotionFlow™

Whatever you're watching, you'll enjoy a silk-smooth and razor-sharp on-screen look in fast-moving action sequences with Motionflow™. This innovative technology can create and insert extra frames between the original frames by first comparing key visual factors on successive frames, then calculating the split second of missing action in the sequences. True Cinema 24p mode mimics true movie projection for cinema purists.

#### Colors come alive with TRILUMINOS™ Display

Discover true-to-life colors and tones. The VPL-VW285ES incorporates TRILUMINOS™ Display color, reproducing more tones and textures than a standard projector system. Hard-to-reproduce crimson reds, aqua blues, and emerald greens are displayed beautifully, so landscapes and seascapes look more vivid. Faces look better, too, with skin tones more faithfully reproduced.

### Enjoy all types of content in 4K HDR.

4K HDR 60p 10bit (for HDR10/HLG) so you can enjoy gaming and other high frame rate content in 4K HDR.

# Support for latest standards.

The VPL-VW285ES can project content at up to 60 frames per second (fps) in 4K for even smoother images with superior color and realism. Both HDMI inputs support HDCP 2.2 so you can enjoy more of the latest 4K content services.<sup>4</sup>

### Watch for longer with a 225 W high-pressure lamp.

Enjoy up to 6000 hours of watch time (in low mode) from a long-lasting mercury lamp. This means fewer lamp swaps, simpler maintenance, and lower running costs.

#### Flexible home installation with wide zoom and shift lens

The powered zoom lens with a 2.1x zoom ratio and wide lens shift range gives greater installation flexibility in any room size, even with a high ceiling.

### Built-in 3D transmitter synchronizes entertainment

A built-in 3D transmitter synchronizes the optional glasses with the projector, so you can start watching 3D movies quicker.3 Upscale 2D films to 3D and enjoy classic movies in a whole new dimension, or watch anamorphic images and 3D films simultaneously without changing the lens. High-emission power gives you a strong signal anywhere in the room.

#### Front-facing fan

With the fan exhaust positioned at the front of the projector, you don't need to worry about wall clearance and room for air intake/exhaust between back of the projector and a wall when installing. This helps maximize throw distance, for the biggest possible projected images.

# Plays your "Mastered in 4K1" discs

The Mastered in  $4K^1$  collection includes classic films, remastered with enhanced color and detail for Bluray Disc. Play these discs with a pixel resolution and color range that's almost identical to the 4K original. The movie is down-sampled from the original 4K source at a high bitrate to Full HD, then upscaled to 4K using the same algorithm.
