

# HydroTap Arc Plus BCS Tap

Product Spec Sheet

## HydroTap Arc Plus Boiling/Chilled/Sparkling (BCS) Tap

The HydroTap by Zip Water is not a faucet. With instant access to filtered boiling, chilled and sparkling water, it's cooking made easy, it's wellness at your fingertips, it's water at its best, and it'll be the most used appliance in your kitchen.

Enjoy the benefits of the Hydrotap system wrapped in the timeless design of the HydroTap Arc Plus. With its curved 'swan neck', it will complement any kitchen or wet bar design – from traditional to contemporary.

This tap style can be installed over the sink as a secondary tap or over our optional design range font/drip tray. The HydroTap Arc Plus tap is available in six different finishes from a classic chrome to a modern gunmetal.

# HydroTap Arc Plus BCS Tap

## Product Spec Sheet

### Installation Requirements

The HydroTap is a pump-driven system so the installation of the Tap must be within 3' (0.9m) of the base command center. Installation on most countertops is straightforward however, some stone countertops may require a specialized cutting service.

If using a drip tray (font) accessory, suitable drainage to a trapped waste is required within 3' (0.9m) of the installation. Sufficient space and clearance to install the HydroTap as detailed in the product installation guidelines is required.

Installation and connection of your HydroTap must be carried out by a qualified person, observing all local, state, & federal regulations.

<b>Included CO<sub>2</sub> Cylinder:</b>	Zip Water 1.5lb CO <sub>2</sub> (includes 2 cylinders) with CGA-320 fitting + CO <sub>2</sub> regulator
<b>CO<sub>2</sub> Operating Pressure:</b>	Min 39psi - Max 44psi / Min 2.74 - Max 3.09kg/cm <sup>2</sup>

# HydroTap 120V BCS G5 Command Center

## Product Spec Sheet

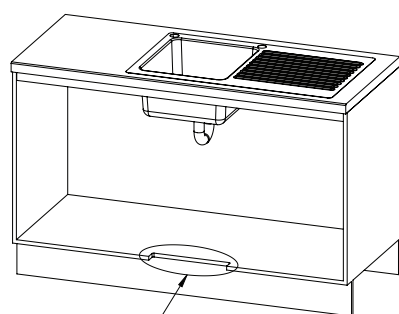

### Installation Requirements

Installation and connection of your HydroTap must be carried out by a qualified person, observing all local, state, & federal regulations. You will require suitable 110-120V 50-60Hz, 15 amp power supply with a NEMA 5-15 electrical outlet within 5' 9" (1.75m) of the product.

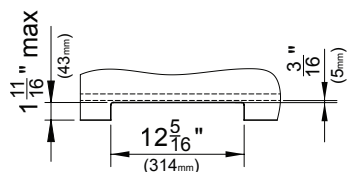

The HydroTap is a pump-driven system so the installation of the Tap must be within 3' (0.9m) of the base command center. The HydroTap is an air-cooled system so discrete cabinetry cut-outs are required for ventilation. Installation on most countertops is straightforward however, some stone countertops may require a specialized cutting service.

If using a drip tray (font) accessory, suitable drainage to a trapped waste is required within 3' (0.9m) of the installation. If you live in an area with hard water (more than 150ppm), we recommend installation of a scale filtration kit or a water softener. Sufficient space and clearance to install the HydroTap as detailed in the product installation guidelines is required.
