

# ASSEMBLY INSTRUCTIONS

- 1 Unfold the bed frame while on it's side until the length of the frame is open. Unfold the legs until you hear a clicking sound. The legs automatically lock in position as shown in figure 1. Place bed frame face up.

- 2 If you have a Highrise bed frame that is Queen size or larger, use the included brace to secure the adjacent frames together as shown in figure 2.

To fold up the bed frame, depress the tab at the end of the locking slider toward the frame to release the locking mechanism. Both tabs on each end will have to be depressed before the legs may be folded in.
