PERFORMA4

C245 Center Channel Loudspeaker

At Revel, science is at the heart of everything we do. Since our very first loudspeaker, we obsessively test and re-test every element so you get the most out of every product. The result is music produced with the utmost purity— music that's played the way the artist intended.

The Performa4 Series is based upon Revel's acoustic DNA including a new 7th generation waveguide with acoustic lens and Deep Ceramic Composite (DCC™) and Micro Ceramic Composite (MCC) transducers. The cabinets and overall industrial design exude modern style while maintaining visual cues that identify with the heritage of the Revel brand.

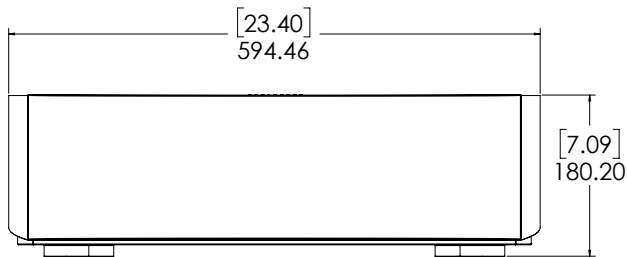

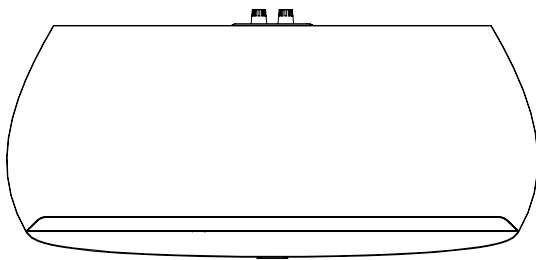

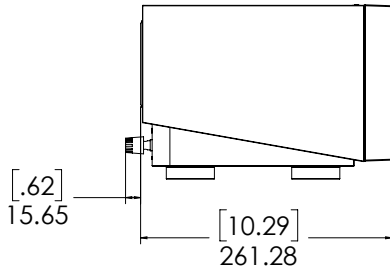

Born from decades of world-class loudspeaker innovation, the Revel C245 provides a dedicated center channel solution for home cinema systems in combination with any of the Performa4 floorstanding and bookshelf loudspeakers. It features dual 5.25-inch (130mm) Micro Ceramic Composite (MCC) cone woofers and a 1-inch (25mm) DCC dome tweeter mounted to a 7th generation Acoustic Lens waveguide. These components work in harmony with a precision crossover network and a bass-reflex tuned port enclosure to achieve unmatched audio accuracy and exceptional dialogue clarity.
