

Bluestone

Behind the Design

Distinctively bluish-grey in tone, increasingly rare bluestone melds rough-hewn material with smooth sophistication. White mineral lines and subtle color, texture and pattern variations are to be expected and speak to each stone's individual nature.

Care Instructions

- Address spills immediately by wiping with a dry, soft cloth.
- Spot-clean as needed with a soft cloth and mild soap.
- Avoid use of cleaning products with acid, vinegar, lemon and ammonia, as abrasive ingredients can damage stone.
- Bluestone surfaces are not scratch- or heat-resistant, and may scuff or stain without proper care. To maintain stone's natural appearance, avoid sharp objects on surfaces. Use coasters, trivets and placemats for protection against hot or wet items.
