

Electronic convection wall ovens

General features

Sophisticated styling. Seamless, hand-finished doors and smooth controls offer a look of modern refinement.

Electronic glass touch controls. A gentle touch allows you to easily select the desired cooking function: convection bake or roast, variable or closed-door broiling, 24-hour delay bake, warm mode or proof mode.

Reverse-Air convection. A bidirectional fan delivers exceptionally consistent cooking performance, allowing heated air to circulate on all sides of food.

Self-clean racks. Porcelain-coated racks are designed to be left in the oven during the self-clean cycle for effortless cleaning.

Halogen lighting. Two halogen lights illuminate your culinary work in progress, putting it into bright, clear perspective.

Concealed bake element. A smooth surface simplifies ash removal after the self-clean cycle.

Advance planning for electronic convection wall ovens

Electrical requirements

Product rating is 208 or 240V, 60Hz. Connect to a 40-amp circuit for double ovens and 20-amp circuit for single ovens. The ovens must be connected to a supply circuit of the proper voltage and frequency and protected by a time-delay fuse or circuit breaker.

Cutout and product dimensions

30" single oven side-by-side installations

Install two ovens in separate cutouts. Allow 2" minimum between the cutouts.
