**Product Description:** Elevate your living room decor with the Chanel Swivel Chair from our luxurious Chanel collection. Crafted with precision from sustainably sourced wood and upholstered in your choice of over 30 leathers, including finished and aniline leather types, this chair exudes contemporary luxury. Featuring a tight channeled barrel back and T-shaped seat cushion, it offers both style and comfort for your home. With its swivel base and poly down innerspring cushion, the Chanel Swivel Chair is the epitome of modern sophistication.

**Status:** Active

**Features:** Tight channeled barrel style back  
T-shaped seat cushion  
Swivel base

**Material:** LEather

**Frame Construction:** Our M upholstered furniture collection pieces are benchmade from sustainably sourced wood and upholstered start to

finish by our skilled craftspeople in both North Carolina and Virginia. Every piece has been thoughtfully designed for today's modern lifestyle. Frames are constructed of sustainably certified kiln dried engineered hardwood. Frame parts are joined with precision cut interlocking joints that are glued, stapled to reduce movement, twisting and warping. Frames have cornerblocks that are glued and screwed at stress points, especially on seat rails and other high stress areas. Depending on rail thickness, frames may be of a hybrid construction, adding a solid hardwood inner frame to give seat rails additional support.

**Seat Back:** Tight channeled barrel back

**Seat:** Poly Down Innerspring Cushion - High resiliency plant-based foam core, with coil spring insert for added comfort and longevity. Wrapped with polyester and down fiber blend enclosed in down proof ticking.

**Leather:** Choice of over 30 leathers to choose from including finished and aniline leather types

**Padding:** Padded outside arms and back for smoother surface and neater appearance.

**Seating Construction:** Seat bases are supported by a sinuous arc metal spring construction. Our springs are made from partially recycled content. Due to the design requirements of some styles, rubberized webbing may be used instead of springs. Double rows of springs are used at the corners for extra support. Seat bases are insulated with polypropylene fabric and are padded with synthetic fiber.
