

# MOE'S

## Segment Dining Table Wood Large Heritage Brown

Designed to gather around, with form that starts the conversation. Segment finds the sweet spot between sculpture and everyday function. Its base layers rounded forms into angled cuts—modern, a little off-center, and easy to love. The mid-tone wood top adds warmth and texture, softening the statement without losing the shape-driven edge. Built for hosting, designed for daily life, and bold enough to anchor the whole room.

- Curves Meet Edges: A uniquely angled leg that intersects with the rounded form creates an eye-catching focal point.
- Inviting by Nature: The mid-tone brown wood finish adds an inviting touch, bringing both visual warmth and texture to the space.
