Cooktop Information

The Evo ceramic-clad cooktop is one seamless piece of spun metal featuring a sol-gel coating that provides reduces maintenance.

The ceramic non-stick upgrade, featuring an FDA-approved (TOR exemption) sol-gel coating that is free of PTFE (Polytetrafluoroethylene; Teflon®) and PFAS (polyfluoroalkyl substances). This advanced coating provides excellent non-stick properties, reduced maintenance, and exceptional all-weather resistance.

COOKING	Unparalleled heat retention and even heat distribution with <u>effortless release</u> .
SEASONING	Eliminates the need for the traditional seasoning and maintenance.
CLEANING	Wipe with soft cloth and soapy water to clean, no need for aggressive scrubbing.
OXIDATION	Cooktop where ceramic coated will NOT oxidize.
MARINE AIR	Protects cooktop from corrosion and pitting caused by oceanfront salt air.
DURABILITY	Ceramic technology allows cooktop to appear shiny and new, even after years of use.
HEALTHY	Little or no oil required.

The cook surface when properly maintained will provide a lifetime of continual service. Regular cleaning and care for your Evo cook surface will keep your grill looking and functioning its best.

Cleaning & Care

IMPORTANT: READ THIS FIRST BEFORE COOKING

The Evo Ceramic-Clad Cook Surface is Ready For Use

- Like a non-stick kitchen pan, avoid cutting directly on the ceramic cooking surface, NEVER use metal utensils that could scratch or damage it, and ALWAYS keep the surface clean and free of debris. With these practices, the surface will provide many years of trouble-free use.
- NEVER strike the cooking surface with a metal spatula or any metal utensil. Striking the cooking surface will cause a sharp impact to the ceramic coating and cause irreparable damage to the surface.
- Properly clean the cooking surface after every use while the surface is still moderately hot. Using a moderately hot surface will allow you to easily scrape away accumulated sugars and fond, and in many cases no other cleaning is necessary other than a final wipe down.
- Do not use harsh abrasive cleaners or aluminum oxide griddle cleaning pads, cleaning screens, and do not use anything that will scratch or remove the ceramic coating. While the ceramic coating is very durable, it can be scratched with sharp objects and abrasive materials.

Cleaning Kit:

We recommend using the grill cleaning kit that came with your Evo grill. In this kit is a nylon scraper, insulated red handle to grip the cleaning pad, and a woven heat resistant nylon scouring pad.

To Remove Heavy Layers of Residue or Carbon Build Up:

If you encounter a difficult to remove build up, place a wet paper or terry cloth towel over the area and allow it to sit in place for 20 to 30 minutes. This will help to soften the area so it can be removed with a scraper or cleaning pad.

For further assistance, contact customer service at (503) 626-1802 or support@evoamerica.com.
