NOTES

Pad-over armrests enhance comfort and provide additional forearm support  
Seat features divided chaise pad for added comfort and refined look  
High-divide back cushions have distinctive look and cradle the head, neck and shoulders  
Biscuit-tufted back cushions the lower back  
Built to last with our DualFlex Spring System™—sturdy steel ribbons attached to flexible coils that offer a wide range of motion and durability  
Handle-activated recline system allows you to manually adjust between sitting and reclining  
Attached back and seat cushions stay right where you want them, keeping you comfortable and your space tidy  
High-density cushions consist of a high-resiliency, high-density polyurethane foam core with a soft fiber wrap that ensures comfort as you sit and recline with a soft fiber wrap that ensures comfort as you sit and recline  
Available in durable, cleanable performance fabrics will withstand everyday use by an active family  
Available in over 250 fabrics to suit any décor  
Removable back allows for easy lifting and maneuvering through doorways  
Footrest easily lowers when you apply pressure in a downward motion  
Choose whether to glide or recline depending on your activity and mood  
Rocking motion enhances relaxation  
Power control allows you to adjust between sitting and reclining  
USB port built into power control for convenient charging  
Power control independently adjusts the headrest and recline for a personalized sit  
Home button returns the headrest and footrest to their original positions with one touch  
Lower the footrest by applying pressure to it in a downward motion. Lowering the footrest with the handle can damage the recliner.  
Power allows you to smoothly recline to any position.  
A single USB port is included on each power button control on styles with arms.  
The power control allows you to independently adjust the recline and headrest.  
A separate home button returns the headrest and footrest to their original positions with one touch.  
A USB port is included on the power control for powering electronics.  
Zero draw technology only uses power when the USB port is in use.
