Product Description: Introducing the Rosemary Armless Accent Chair, a chic addition to our modern assortment. This chair features a tight seat and back highlighted by welt trim, showcasing the beauty of wood with its wood frame and cone-tapered front legs. Available in your choice of wood finishes, including Ebony, Perk, and Toffee, it allows you to customize your chair to suit your style. With over 30 leather options to choose from, including finished and aniline leather types, the Rosemary Chair offers both style and comfort for your living room.

Status: Active

Finish: Choice of Ebony, Perk & Toffee finishes

Features: Wood frame

Tight seat and back

Cone tapered legs on the front

Welt trim

Material: Leather

Frame Construction: Our M upholstered furniture collection pieces are benchmade from sustainably sourced wood and upholstered start to finish by our skilled craftspeople in both North Carolina and Virginia. Every piece has been thoughtfully designed for today's modern lifestyle. Frames are constructed of sustainably certified kiln dried engineered hardwood. Frame parts are joined with precision cut interlocking joints

that are glued, stapled to reduce movement, twisting and warping. Frames have cornerblocks that are glued and screwed at stress points, especially on seat rails and other high stress areas. Depending on rail thickness, frames may be of a hybrid construction, adding a solid hardwood inner frame to give seat rails additional support.

Seat Back: Tight back

Seat: Poly Seat Cushion - Tight seats: High resiliency plant-based foam with an overlay of polyester fiber.

Leather: Choice of over 30 leathers to choose from including finished and aniline leather types

Padding: Padded outside arms and back for smoother surface and neater appearance.

Seating Construction: Seat bases are supported by a sinuous arc metal spring construction. Our springs are made from partially recycled content. Due to the design requirements of some styles, rubberized webbing may be used instead of springs. Double rows of springs are used at the corners for extra support. Seat bases are insulated with polypropylene fabric and are padded with synthetic fiber.
