(emBrace)™ 360
WrapAround Bed Support System

(emBrace)™
Designed and Engineered for Today's Sleep Sets

ENGAUGE™
BED SUPPORT SYSTEM

The emBrace™ 360 WrapAround™ is a **versatile** mattress support system.

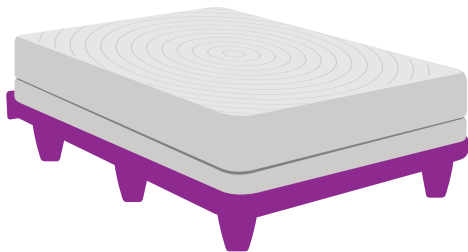

The emBrace WrapAround™ 360 is a designer support system crafted with the finest materials and workmanship. Contoured feet and side rails with tapered legs establish the emBrace WrapAround™ 360 as the vanguard of bedroom fashion.

Choose your foundation height.

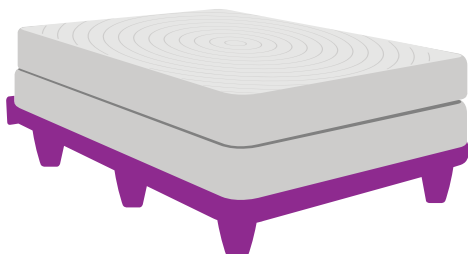

Foam / Latex / Inner Spring

"Bunkie Boards" can be used with a WrapAround omitting the need for a box foundation.

Low Profile Box Spring

Compatible with low profile box foundations, the foot end contours allow for an easy and accurate fit.

Traditional Box Spring

Compatible with traditional box foundations, the foot end contours allow for an easy and accurate fit.

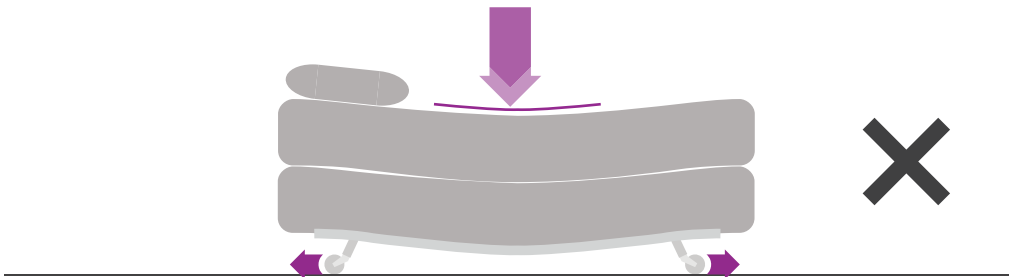

(emBrace)³⁶⁰
WrapAround Bed Support System

Won't
crack
under
pressure.

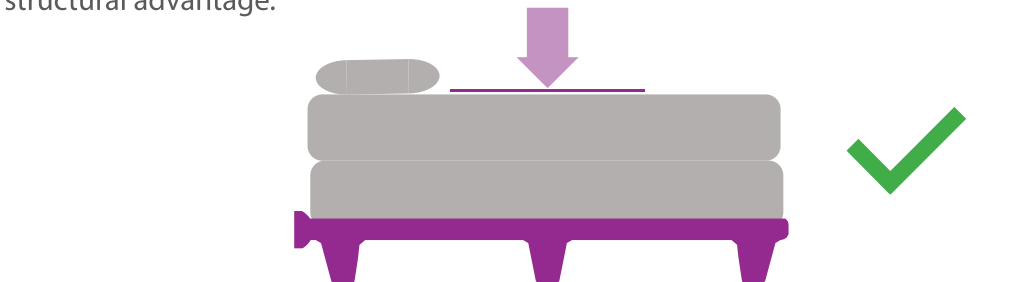

(emBrace)³⁶⁰
WrapAround Bed Support System

Traditional bed frames can flex and warp under pressure.

The emBrace WrapAroundTM 360 uses high carbon recycled railroad steel.

The steel cross rails feature T-shape profiles that give the frame a rigid, zero-flex structural advantage.

The emBraceTM WrapAroundTM 360 is tested and approved to hold up to 5,000 pounds!

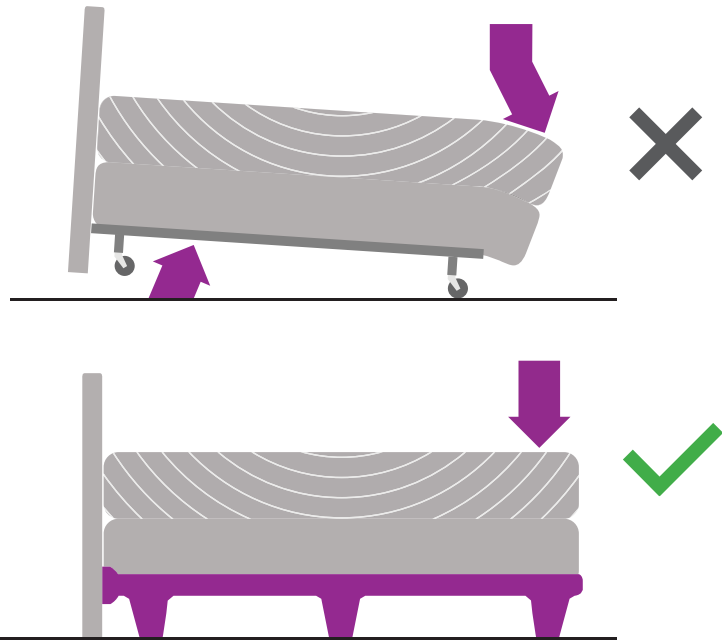

Upgrade your mattress
and get better sleep
with proper support.

Proper support will **improve the feel** of your mattress and **extend the life** of your sleep set. Your mattress was designed to be at its best seated on a **high quality support system**.

Working a double.

Fully supported double beams at the foot end of the bed prevents tipping. The inner corners are rounded allowing a foundation to fit seamlessly.

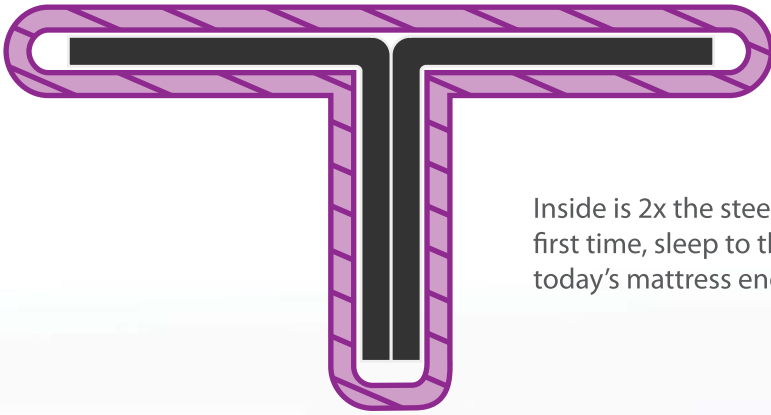

The patented T steel design of the emBrace™ WrapAround™ 360 is vertical in side rails, providing rock solid support in all sizes. This system produces incredible strength that will not flex.

Double Foot Rail Supports

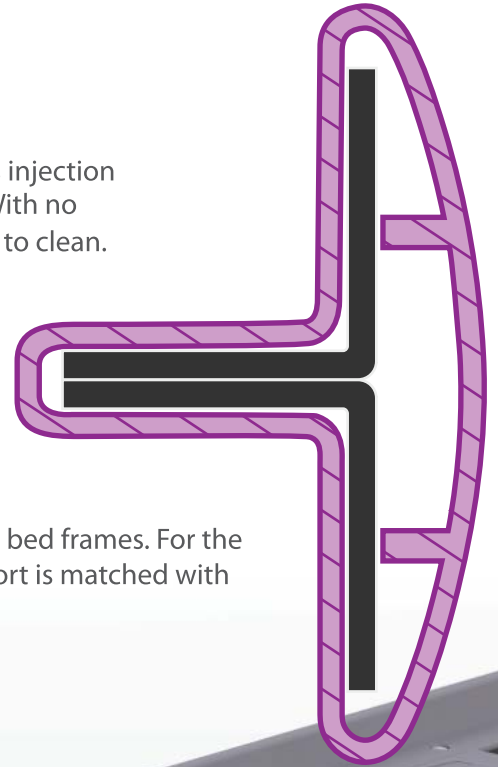

(emBrace)TM 360
WrapAround Bed Support System

Steeling the show.

From the outside, the emBrace WrapAround 360 system is injection molded, featuring resin parts that are fiberglass infused. With no exposed metal, it is warm to the touch, hygienic and easy to clean.

Inside is 2x the steel of traditional bed frames. For the first time, sleep to the edge support is matched with today's mattress engineering.

Steel Side Rail Support

Double Foot Rail Supports

Frustration not included.

Tool Free.
Gravity feed assembly.

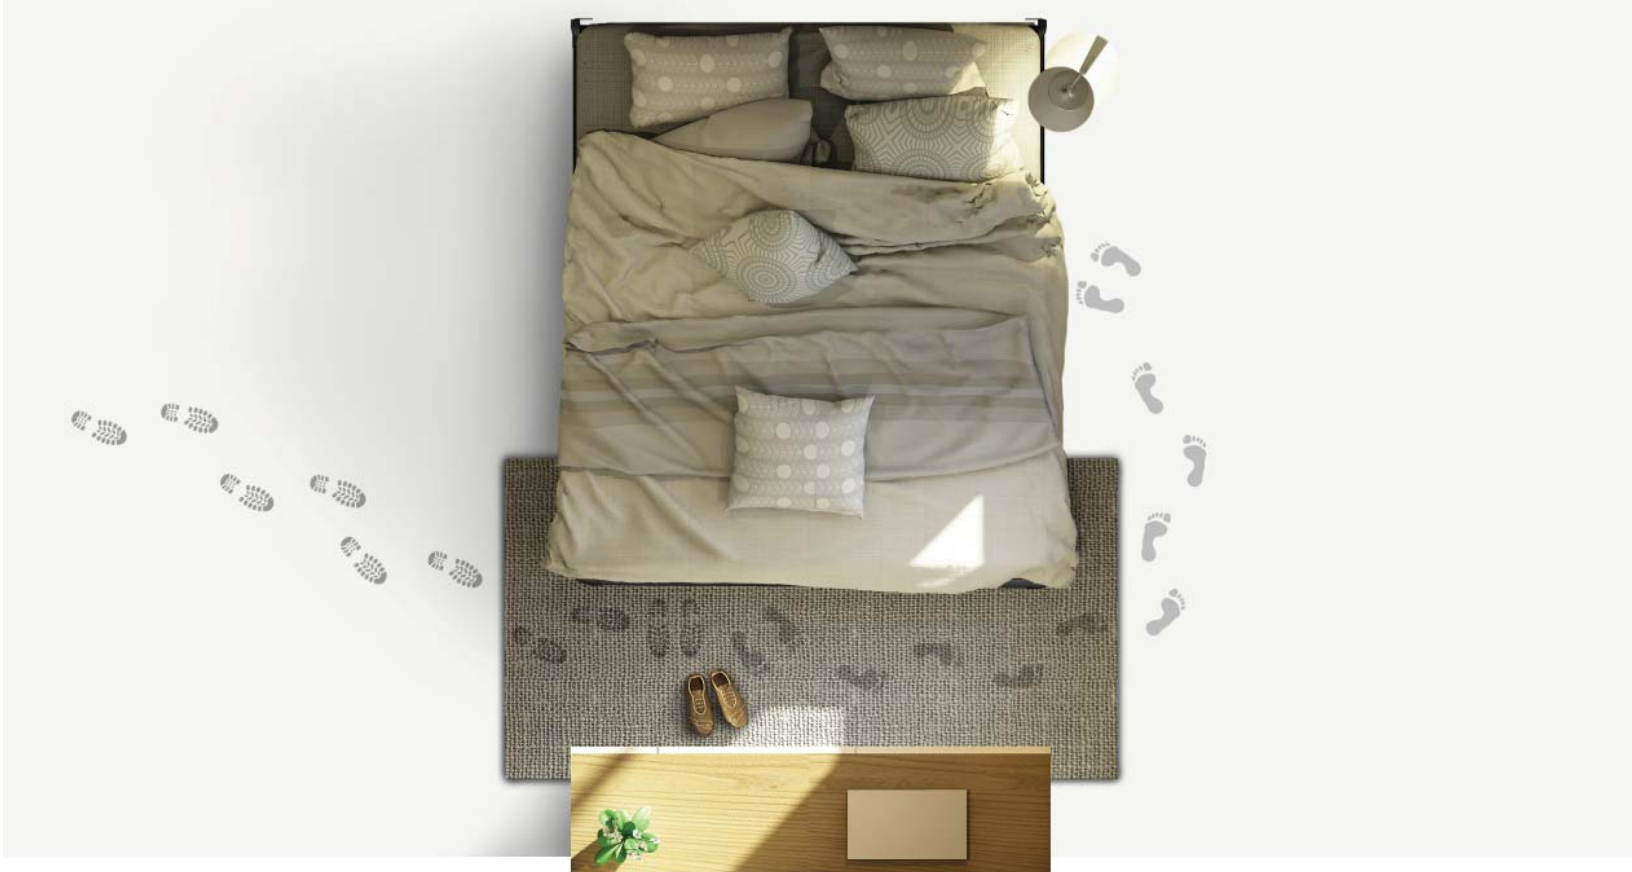

Goes together in seconds!

Leave the assembly to the **experts.**

Parts come pre-assembled leaving more time and less headache

(emBrace)³⁶⁰
WrapAround Bed Support System

Any headboard.
Endless options.

No footboard means more access.

Without a footboard, you will find more access to the bed and better navigation within the space.

Baby proof.

Smooth contours create a baby safe product. Inset legs and soft edges alleviate stubbed toes and provide an enlarged walking space.
