## GTK-XB7RC
### High Power Home Audio System with Bluetooth®

Bring the night alive with this EXTRA BASS™ wireless Bluetooth® and NFC speaker system that pumps up any gathering with powerful, clear bass, club-like LED lighting and DJ effects.[1]  Stream and control great sounding music from your smartphone and even add extra wireless speakers to the mix. It's ready to hit the party scene with bass that hits.

## Bullets

- Feel the powerful, clear sound of EXTRA BASS™
- Connect and stream music easily with Bluetooth® and NFC[2]
- Pump up that party feeling with club-like LED lighting[1]
- Stand it up or lay it down with a flexible, two-way design
- Connect and add more speakers with Party Chain
- Add to a TV or other equipment with audio input/output
- Plug and play with your favorite devices via USB
- Increase the clarity and quality of what you hear with ClearAudio+
- Customize and control things from your smartphone with SongPal

## Features

### Feel the power of EXTRA BASS

Made for today's heavy-hitting bass lines and dropping beats, EXTRA BASS™ technology delivers powerful, clear bass sound where it's hardest to find—in portable speakers and headphones. The result is a full, deep, resonating sound that's perfect for EDM, Hip-Hop and other music. So push the button, crank it up and let the bass drop.

### Connect and stream music easily with Bluetooth® and NFC

Enjoy easy, one-touch connectivity and music streaming with NFC. No NFC? No problem. Connect via Bluetooth and you're ready to go.[2]

### Pump up that party feeling  with club-like LED lighting

Make it a party with club-like LED speaker illumination.[2] The LED light speakers feature multicolor patterns, ranging from pure white to rainbow. Synchronizing with the rhythm of the beat, the power and speed of the light display matches the musical mood and atmosphere.

### Stand it up or lay it down

A flexible two-way design gives you great sound, wherever you place the system. Set it up horizontally for a classic boombox feel, or flip it upright if you're short on space. A built-in sensor optimizes how sound is processed to stereo sound, whichever setup you choose.

### Connect and add more speakers with Party Chain

Add extra power to your sound system. Connect multiple stereos in a chain for a higher sound output. Activate one device to be the 'Party Host' and sync music with the other systems in the chain.

### Add to a TV or other equipment

Hook up a TV, speaker or other audio-video equipment with audio input/output to give your home entertainment an audio boost.

### Plug and play with your favorite devices

With a USB port, you'll be able to plug in a USB, smartphone, tablet or laptop and play all your digital files. Compatible with MP3, WMA, and WAV formats, you'll be able to keep the party moving with your favorite playlists.

### Increase the clarity and quality of what you hear

# SONY

Unique to Sony, ClearAudio+ automatically adjusts sound settings for an enriching listening experience. By bringing together expertise in digital signal processing technologies, ClearAudio+ is able to optimize audio to deliver a consistently clear, high-quality sound, whether you're enjoying music, movies or games.

## Customize and control everything from your smartphone with SongPal

Have fun with your party settings from the dance floor with the SongPal app.[1] Simply download onto your smartphone and enjoy wireless control of all your party settings. Switch up lighting patterns, or activate DJ effects and EQ settings to pump up the atmosphere. You can also select your favorite playlists from USB and cue the next song, without being tied to the DJ booth.
