James Loudspeaker designs and manufactures innovative solutions to provide the finest outdoor entertainment experience. The Omni Planter 89AT4-P loudspeaker by James makes a great addition to the All-Terrain Series by offering 360-degrees of full range, crystal clear music. Ideal for any setting where above ground installation is preferred, the Omni Planter 89AT4-P cleverly accommodates a decorative plant of choice nestled into the top section of the all-aluminum loudspeaker enclosure. Typical applications include rock scape areas or any other environment where traditional in ground satellite/subwoofer combinations cannot be installed, or large open seating venues such as outdoor theater that demand detailed and dynamic coverage. The James Loudspeaker Omni Planter 89AT4-P delivers superb full range performance from a décor-friendly compact enclosure.

The Omni89AT4-P allows a single enclosure to do the same job of four James 42AT All-Terrain satellite speakers and a 8" down-firing subwoofer, delivering the same legendary James landscape performance in a more compact above ground unit.

The Omni89AT4-P is constructed from 5052 marine aluminum enclosure and is available in 15 standard colors and unlimited custom finishes to allow seamless integration into all outdoor environments.

The units, assembled and tested in Napa, California from the highest quality materials come standard with a 3 year outdoor warranty. The Omni89AT4-P can also be optionally configured as a non-biamp unit. For the 70V version order the Omni89AT4-P70.

Optional M1000

1000W Subwoofer Amplifier w/DSP-2U
Suggested for all James subwoofers
