Filling Material in Pillows

Stanton warrants the filling materials used in pillows against fiber breakdown as long as you, the original purchaser, own this product. All filling materials will soften and will settle slightly with normal use and therefore, pillows must be regulated (fluffed) as regular maintenance. Should you experience abnormal fiber breakdown, Stanton will provide replacement fiber. Stanton holds no responsibility for labor to replace or fill pillows.

Frame and Spring Seat Base

Warranty Conditions – Stanton warrants the frame and spring seat base to be free from defects in material and workmanship under conditions of normal use as long as you, the original purchaser, own this product.

Seat Cushions

Stanton warrants the seat cushions against loss of foam resiliency as long as you, the original purchaser, own this product. Please do not confuse loss of foam resiliency with softening. Cushions will soften through normal use and conform to the users shape. This is normal and is not considered a defect. Typically, if defective, it will be noticed within the first year. Stanton holds no responsibility for labor to replace or fill cushion covers or cores. Stanton warrants feathers for three (3) years from the date of purchase.

Limited Warranty

Fabric

Stanton warrants fabrics to you, the original purchaser, for a period of one year against seam slippage, seam failure, fabric separation and dye transfers. Excluded in this warranty are customer owned material, fading, stretching, dye lot variation, pilling*, pet use and heavy soiling. Any after-market stain treatment applied to the fabric voids the warranty.

*Pilling and some fuzzing is NOT considered a defect but rather the normal and inevitable progression of wear in many if not all woven fabrics. If this characteristic is unacceptable to you, the consumer, then you should consider a non-woven velvet or knit fabric and NOT a woven fabric. Some velvets and high pile chenille's, due to the nature of their construction, will appear to mark or crush. This is considered a normal characteristic and not a defect.

Sleeper Bed Mattresses and Mechanisms

Stanton warrants all sleeper mattress and mechanisms from defects in materials and workmanship as follows:

Gel Mattress & Mechanism - 10 Years

Mattresses will soften with normal use and this is not considered a manufacturing defect. Improper handling, care or abuse of the sleeper mechanism will void the warranty. Never close the mechanism with sheets and/or blankets on the mattress. Improperly opening or closing a sleeper and/or sitting on the end will result in damage and is not covered under this warranty.

Basic Care of Fabric Upholstery

With proper care, your Stanton furniture will retain its beautiful appearance and superior comfort for many years. We suggest that you observe simple care steps:

- Avoid placing furniture where it is exposed to direct sunlight.
- Loose cushions should be turned periodically.
- An occasional “once over lightly” with a soft brush vacuum attachment will prevent surface dirt from being forced into the fabric.
- Exposed wood should be dusted as needed with a clean, lint-free absorbent cloth.
- To clean wood parts, use a soft, damp cloth. If necessary, use a mild soap solution and rinse with clean, cool water. Dry with a soft cloth.
- For extra protection of exposed wood parts, use a light application of good quality furniture polish, rubbing with the grain. When dry, buff with a soft cloth.
- Wood scratches and nicks can be touched up with a crayon, shoe polish or touch-up stick.
- Please visit our website at Stantonsofas.com to find additional cleaning and care information under the product care section.
