

Introducing the **New** Fast and Accurate Professional-Grade Infrared Cooking Surface Thermometer

The Big Green Egg Professional-Grade Infrared Thermometer safely measures the temperature of cooking surfaces from up to 5 ft (1.5 m) away for precise heat control every time! Take the guesswork out of grilling ... simply aim the precision laser light beam at pizza stones, cast iron griddles or cooking grids to instantly read the surface temperature before adding food to the grill. Used by top chefs for perfect cooking results!

Professional-Grade Infrared Cooking Surface Thermometer

Item Code: INFRATHERM / 114839

- Measures any surface temperature in a range from 32°F to 800°F (0°C to 427°C)
- Accurately displays surface temperature reading in seconds
- Large, easy to read backlit LED display
- Auto powers off to conserve battery life
- Uses 2 replaceable AAA batteries (not included)

NOTE: Not for measuring the internal temperature of food.

WARNING: Never look at the light beam! Never point the laser light at another person! Avoid direct exposure of human eyes to laser light; eye damage may result. Avoid indirect eye exposure via reflective surfaces, such as glass and mirrors. This is not a toy. Keep out of reach of children!
