# Welcome

Welcome to the Speed Queen® family. Thank you for your support of our truly commercial quality products. Our washers and dryers are expertly engineered to deliver commercial performance, tested to ensure ultimate durability and built with American Pride. For more than 110 years, Speed Queen consumer laundry products have been manufactured in Ripon, Wisconsin, a place where pride of workmanship is not just alive, but thriving and embodied by each individual who designs, tests, assembles or in some way touches a Speed Queen product. A special thing happens when that pride is combined with the highest quality commercial materials and components...it leads to the ultimate reliability...reliability measured in decades, not years. That's legendary Speed Queen Quality.

# Cycle Information

The following cycle descriptions will help determine which cycle to choose depending on the type of laundry being washed. The cycle settings may be modified using the Selections and Options.

## Heavy Duty

Use for sturdy items, like play or work clothes, towels, T-shirts, etc. The cycle includes a longer wash tumble and two rinses. The final spin extracts moisture at a high spin speed.

## Normal Eco

This cycle includes a wash tumble and two rinses, but uses less water than the other cycles. It also uses less hot water. Only the high spin speed is available in this cycle. This cycle is recommended for washing everyday cottons and linens.

## Perm Press

Use for permanent press items and synthetics. This cycle includes a wash tumble and two rinses. The final spin extracts moisture at a low spin speed.

## Delicate

Wash delicate items usually washed by hand on this cycle. The cycle includes a wash tumble and two rinses. The final spin extracts moisture at a low spin.

## Whites

This cycle is designed to keep white laundry white. It utilizes a longer, hot water wash tumble and two rinses. The final spin extracts moisture at a high spin speed.

## Sanitize with Oxi

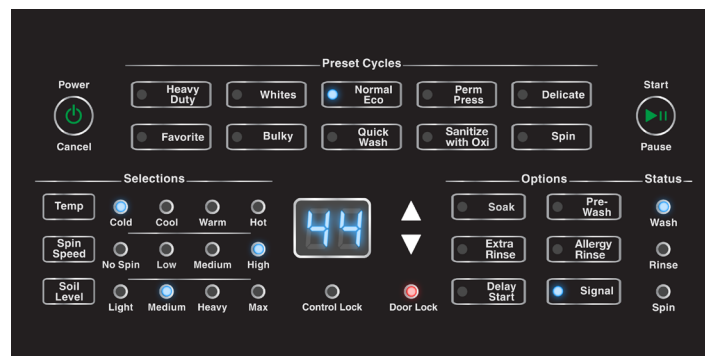

This cycle has been verified to reduce 99.9% of bacteria found in the typical household laundry load when used with an Oxi additive in addition to detergent. In addition there is no significant contamination transferred to later washer loads.

## Favorite

The Favorite keypad allows the user to save nine different cycles, selections and options for later use.

1. Press the Favorite keypad. The control will display the settings for the first Favorite cycle. The display will switch between F1 and the cycle time for the selected cycle. If a Special Cycle is selected, the display will switch between F1, P1 and the cycle time.
2. Press the keypads for the desired settings.
3. Press the Favorite, Start/Pause or Delay Start keypad to save the current settings.
4. Press the Power/Cancel keypad to discard the current settings.
5. The next Favorite cycle, F2, will be displayed.

After the cycles have been saved, they can be accessed using the up and down arrow keypads after pressing the Favorite keypad.
