Glacier Touch™ 4-Way Stretch Cover
Glacier Touch™ 4-Way Stretch Cover with Lycra® Fabric is cold to the touch for a cooler, comfortable night's sleep.

Therawrap® Individually Wrapped Coils
Therawrap® Individually Wrapped Coils featuring edge to edge support provide a full uniform sleep surface and are designed to flex and conform independently of each other, reducing motion transfer and helping to eliminate partner sleeping disturbance.

TheraCool® Advanced Copper & Gel Quilt
100% Gel Infused Foam provides maximum comfort and greater pressure relief with the added benefit of wicking away heat from the body for a cooler, more restful and deeper sleep. The addition of Copper provides protection against viruses and microbial growth.

Repreve® Fiber
Recycled plastic bottles are transformed into a quality textile fiber, that's sustainable! So far, over 4 billion plastic bottles have been recycled into this comfortable, long-lasting fiber.

Sanitized® Finish
Our zinc-based process inhibits bacteria and permanently prevents undesired growth of microbes. It inhibits bacteria, mildew, and dust mites to keep your mattress fresh and comfortable.
