DIAMOND
MATTRESS

CoolStream® Maximum Cooling Fabric

Special conductive yarns actively move heat through the fabric to maintain a cool, comfortable sleeping environment all night long.

Uniform Technogel Cooling Layer

Technogel's naturally high thermal conductivity means it helps disperse the heat released from your body throughout the night. Plus, an innovative grid design helps promote airflow and breathability to enhance the thermal regulation.

Supportive Natural Latex

Natural latex is an environmentally friendly material that is hypo-allergenic, anti-microbial and extremely breathable while providing a buoyant, weightless feel.

High Density Orthopedic Support Core:

Pressure relief and contouring is delivered with our stable high density, CertiPUR-US certified foam core to provide support and comfort
