M Series Built-In Ovens

Contemporary M series ovens include stainless steel and black glass models. Superior performance features include a more advanced dual vertical convection fan system, touchscreen controls, convenient preset cooking programs, and improved interior lighting. There is more usable space inside for deliciousness on a grand scale. M series ovens can be installed in a standard or flush inset application.

Planning Information

The M series oven can be installed in a standard or flush inset application. If a cooktop is installed above an oven, a minimum of ¼" (6) is required between the units. The location of the electrical supply within the oven opening may require additional cabinet depth.

Finish the edges of the opening. They may be visible when the door is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum ⅛" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

INSTALLATION REQUIREMENTS

BASE SUPPORT	MIN
Single Oven	250 lb (115 kg)
Double Oven	400 lb (181 kg)
TRIM OVERLAP	
Top	1" (25)
Bottom	0" (0)
Sides	1⅛" (18)

DUAL INSTALLATION

Two M series single ovens can be installed side by side in a standard or flush inset application. A dual installation kit is required. To maintain appropriate airflow, the ovens must be installed into one opening. Any cosmetic or structural material placed between the ovens will impede airflow and is not recommended. Refer to the illustrations on pages 14–15.

The dual installation kit is available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes. Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the oven can be placed in an adjacent cabinet within reach of the conduit.

Performance may be compromised if the electrical supply is less than 240 volts.

The oven is supplied with a conduit consisting of two insulated hot lead conductors and a bare ground conductor. The wiring diagram covering the control circuit is provided with the oven.

ELECTRICAL REQUIREMENTS—SINGLE OVEN

Electrical Supply	grounded, 240/208 VAC, 60 Hz
Service	30 amp dedicated circuit
Conduit	4' (1.2 m)
Total Amps	22
Max Connected Load	5.4 kW

ELECTRICAL REQUIREMENTS—DOUBLE OVEN

Electrical Supply	grounded, 240/208 VAC, 60 Hz
Service	50 amp dedicated circuit
Conduit	5' (1.5 m)
Total Amps	45
Max Connected Load	10.8 kW

E Series Built-In Ovens

The Wolf E Series convection oven has two fans and four heating elements. Ten cooking modes allow you to select the one precisely suited to the dish you're preparing. The oven is self-cleaning. E series ovens are crafted of stainless steel. The handles match the rest of the Wolf cooking appliance offering, providing a more cohesive look. E series ovens can be installed in a standard or flush inset application.

L Series Built-In Oven

Since their introduction, Wolf L series built-in ovens have taken the culinary world by storm—and not just for their stylish cobalt blue interior and 10 cooking modes. Thanks to a Wolf innovation called dual convection, the L series delivers faster, more consistent results for baking, roasting, broiling—even drying fruits. The Wolf L series oven is offered in the 36" width with unframed door style and tubular handle.

Convection Steam Ovens

The legacy of the “combination oven” goes back decades, to innovative chefs in America and Europe who embraced the combination of air movement with superheated steam to achieve superior results—from breads and roasts to delicate fishes, seafood, and vegetables. Wolf combines the benefits of convection and steam for the most innovative steam oven on the market today. Virtually any dish prepared in a conventional oven, range, or microwave can also be prepared in the Wolf convection steam oven—with more control. Two widths and three distinct styles compliment the look of Wolf ovens, ranges, and cooktops. Convection steam ovens can be installed in a standard or flush inset application.

Microwave Ovens

As true cooking instruments, Wolf microwave ovens have features that make fast meals better meals. The drop-down door microwaves feature a door that hinges at the bottom for easier access to foods. Available in 24" and 30" widths, they are designed to match Wolf transitional, professional, and contemporary products. Drawer microwave ovens can be conveniently located undercounter, in a corner, or below an oven. Wolf also offers both a roomy, powerful standard microwave and a convection model that can microwave, broil, and cook in three convection modes. Trim kits to match Wolf ovens are available through an authorized Wolf dealer. Microwave ovens can be installed in a standard or flush inset application.

Warming Drawers

Wolf warming drawers are designed to take care of prepared foods until it's time to serve them. You can adjust the temperature, keeping moist foods moist, and crisp foods crisp. Warming drawers are ideal for proofing dough. They can also be used to warm robes and towels. Drawer fronts are available to match the look of Wolf ovens, sealed burner rangetops, and outdoor grills. The integrated drawer front allows for a custom panel and handle. Model WWD30O, approved for outdoor installations, is ideal for any outdoor kitchen.

DRAWER FRONT OPTIONS

Wolf warming drawer fronts allow for many design options, but the warming drawer itself will be the same for all applications. A panel mounting kit is required when installing a custom panel. The panel mounting kit is available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

The 2" (51) thick drawer front, in 30" and 36" widths, is designed to be installed below a sealed burner rangetop or outdoor gas grill, so the panel aligns properly with the front of the rangetop or grill. Dimensions for the warming drawer remain the same, even though the drawer front may be wider to match a Wolf 36" oven, sealed burner rangetop, or outdoor grill.

Dimensions (typical)	29 ⁷ / ₈ " (759)	10 ³ / ₈ " (264)	3 ⁴ / ₄ " (19)
Min Thickness			5 ⁸ / ₈ " (16)

Planning Information

The warming drawer must be installed with a Wolf drawer front, available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. Specific installation instructions are included with the drawer front.

The warming drawer can be installed in a standard or flush inset application (excludes L series drawer front).

For a standard installation, the drawer collar and front panel sit proud of the cabinet face frame. A recessed installation requires the cabinetry be recessed by 3/16" (5) so the collar is flush with the cabinet face frame but the drawer front will sit proud. A flush inset installation (excludes L series) requires the drawer collar and front panel be recessed to be flush with surrounding cabinetry. Refer to illustrations on the following pages for minimum cabinet dimensions for your specific installation.

Finish the edges of the opening. They may be visible when the drawer is open.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

Model WWD300 is CSA approved for outdoor installations.

INSTALLATION REQUIREMENTS

Min Base Support	200 lb (90 kg)
Trim Overlap (top, bottom, sides)	5/8" (16)

Planning Information

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the back wall and within the shaded area shown in the illustrations on the following pages. For ease of installation, the electrical supply for the warming drawer can be placed in an adjacent cabinet within reach of the power cord.

IMPORTANT NOTE: When installed outdoors, a ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type
Power Cord	3' (.9 m)

Warming Drawer

STANDARD INSTALLATION

NOTE: Location of electrical supply within opening may require additional cabinet depth.

Warming Drawer

FLUSH INSET INSTALLATION

*Will be visible and should be finished to match cabinetry.
**Dimension provides minimum reveals.
***24 1/8" (613) for E series contemporary drawer front.
NOTE: Location of electrical supply within opening may require additional cabinet depth.

DRAWER FRONT DEPTH (A)	M SERIES	E SERIES
Transitional/Professional	7/8" (22)	1 1/8" (29)
Professional (2" thick)	NA	2 1/8" (54)
Contemporary Stainless	7/8" (22)	NA
Contemporary Black	1" (25)	1 3/8" (35)

Custom front panel depth is dependent on panel thickness. Add 1/4" (6) to the panel thickness to determine the drawer front depth.

Induction/Electric Cooktops

Induction Cooktops

Almost instantaneous temperature response. Practically no wasted heat. Induction cooking has been popular among European chefs and homeowners for decades. Now Wolf leads the way in bringing this remarkable technology to North American kitchens. Its secret is magnetism. Electromagnetic elements cause iron and magnetic stainless cookware to heat up instantly and with perfectly distributed heat. Heat generation stops the instant you turn off the element or remove the pan. The cooktop's surface remains cool. Your kitchen stays cooler too.

Transitional models have a brushed stainless steel trim. Contemporary models can be mounted flush with the countertop. The following models have the same stainless steel frame as our module cooktops for paired installations: CI243TF/S, CI304TF/S, and CI365TF/S.

Electric Cooktops

Wolf electric cooktops use high-frequency pulsation technology for the most exceptional performance and control ever in a Wolf electric cooktop, with blazing hot sears at the high end and steady simmers and melts at the low end—a low-end finesse that is unusual in an electric cooktop. The updated element configuration accommodates a wide variety of cooking vessels and dish preparation.

Planning Information

A minimum 2" (51) is required from the bottom of the cooktop to combustible materials.

Contemporary induction and electric cooktops can be mounted flush with the top of the countertop, or as a frameless standard installation sitting on top of the countertop surface. If the cooktop is to be mounted flush with the countertop, a recessed area surrounding the cooktop cutout must be provided.

IMPORTANT NOTE: Flush mount installations are intended for granite, solid surface, or stone countertop surfaces only.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required.

Gas Cooktops

Like their oven counterparts, Wolf gas cooktops feature three unique looks—transitional, professional, and contemporary. Performance enhancements make delicious results even more of a certainty than ever. Multiple sizes, choice of knob colors, and distinctly different grates. For a striking, low-profile look, the contemporary gas cooktop fits flush to the countertop with front-mounted controls that integrate directly into cabinetry below.

Model CG243TF/S has the same stainless steel frame as our module cooktops for paired installations.

Planning Information

A minimum 2" (51) is required from the bottom of the cooktop to combustible materials. If the cooktop is installed above an oven, a minimum of 1/4" (6) is required between the units.

The contemporary gas cooktop can be mounted flush with the top of the countertop, or as a standard installation sitting on top of the countertop surface. If the cooktop is to be mounted flush with the countertop, a recessed area surrounding the cooktop cutout must be provided. The countertop must be able to withstand temperatures up to 300°F (149°C).

Control knobs for the contemporary gas cooktop are designed to be mounted on the front face of cabinetry below the unit. Mounting holes must be drilled through the cabinet face. Refer to the illustrations on pages 74–75 for the hole location.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes. Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type

Outside corner radius 3/8" (10).

Module Cooktops

Wolf modules have been redesigned to match the updated lines of Sub-Zero and Wolf. Controls, grates, and trim allow them to integrate perfectly with their larger counterparts and deliver equal performance. Combine modules à la carte-style to create a custom cooktop, or add specialty functions alongside an existing cooktop.

Full-size cooktops including CI243TF/S, CG243TF/S, CI304TF/S, and CI365TF/S feature the same brushed stainless frame, making them ideal for pairing with modules.

Countertop cutout

Planning Information

ELECTRICAL

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required.

When multiple cooktops or modules are installed side by side, each must have its own separate electrical supply.

ELECTRICAL REQUIREMENTS

ELECTRIC MODULES

Electrical Supply	grounded 3-wire, 240/208 VAC, 50/60 Hz
Steamer, Fryer, Grill, Teppanyaki	15 amp dedicated circuit
Induction, Electric	20 amp dedicated circuit
Conduit	flexible 4' (1.2 m)

GAS MODULES

Electrical Supply	grounded, 120 VAC, 50/60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type
Power Cord	6' (1.8 m)

DRAIN OUTLET

Steamer and fryer modules require a method for draining hot water and oil. For the steamer module, options include connecting a drain hose from the 5/8" (16) outlet tied into an existing drain, a separate drain with freefall, or placing a heat-resistant receptacle under the drain outlet. For the fryer module, the drain outlet must be accessible to drain oil into a heat-resistant receptacle.

Planning Information

GAS SUPPLY

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

When multiple gas cooktops or modules are installed side by side, they can receive their gas supply from a common line. However, each unit must have its own regulator installed between the mainline and the cooktop or module.

Wolf natural gas cooktops will function up to 10,250' (3124 m) in altitude without adjustment and LP gas cooktops will function up to 8,600' (2621 m). If the installation exceeds these elevations, contact an authorized Wolf dealer for a high altitude conversion kit.

Coffee System

Make professional-quality coffee, espresso, cappuccino, latte, and more. The Wolf coffee system automatically steams and foams the milk perfectly. The water temperature and brew strength are adjustable. It uses either whole-bean or ground coffee. The design pairs beautifully, either side-by-side or in a tower application, with other Wolf products such as the convection steam oven. The coffee system can be installed in a standard or flush inset application. All 30" trim options are based on model EC24/B.

DIMENSIONS

WIDTH

W

24" Model	23 1/2" (597)
30" Trim	29 7/8" (759)

Planning Information

The coffee system can be installed in a standard or flush inset application. Trim kits are available for vertical, single and horizontal configurations. All 30" trim options are based on model EC24/B. There are no trim options for model EC24/S.

The sides of the cabinetry opening must be adequate to support installation of the mounting slides. Refer to the illustration below.

Finish the edges of the opening. They may be visible when the unit is slid forward.

For standard installations, the face trim will overlap stiles and rails. Refer to the chart below.

For flush inset installations, a minimum 1/8" (3) reveal is required on all sides. To ensure consistent reveals, each corner of the opening must be exactly 90°.

COMBINATION INSTALLATIONS

IMPORTANT NOTE: If a product is installed next to the coffee system, a horizontal kit must be specified. For all other configurations, a vertical kit must be specified.

To install a coffee system above a cup warming drawer, one opening for both units must be specified. To achieve the minimum reveal between the units, place the coffee system support rails on top of the cup warming drawer, then secure the rails to the sides of the cabinet. Any material between the units will increase the horizontal reveal between the two products.

Dual Fuel Ranges

Discover a new world of cooking—the best of two worlds, actually—with a Wolf dual fuel range. Topside, gas cooking in all its glory, with the fine control of dual-stacked, sealed burners and options that include the remarkable French top. Below, that marvel of culinary technology, the Wolf convection electric oven. Its two fans and four heating elements let you select from 10 cooking modes so you can choose the one precisely suited to the dish you're preparing. The ovens are self-cleaning. With a variety of range widths to choose from, kitchens large and small become gateways to the exciting new world of dual fuel cooking. All models are constructed of stainless steel and can be ordered in natural or LP gas.

Planning Information

IMPORTANT NOTE: When installing against a combustible surface, a minimum 10" (254) riser is required for a 36" dual fuel range with charbroiler or griddle and all 48" and 60" models. Follow all minimum clearances to combustible surfaces shown in the illustration on the following page.

A Wolf pro ventilation hood is recommended with the dual fuel range. Refer to page 148 for Pro Ventilation.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the wall or floor and within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

If a power supply cord is used, the cord must be designated for use with ranges and rated for 240 V, 30 or 50 amps (refer to the chart below), and must include 3 or 4 conductors. A 4-conductor cord is required for installations where grounding through the neutral is prohibited.

Performance may be compromised if the electrical supply is less than 240 volts.

ELECTRICAL REQUIREMENTS—SINGLE OVEN

Planning Information

When installing against a combustible surface, a minimum 20" (508) riser is required. Follow all minimum clearances to combustible surfaces shown in the illustration on the following page.

A Wolf pro ventilation hood is recommended with the gas range. Refer to page 148 for Pro Ventilation.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the wall or floor and within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 110/120 VAC, 60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type
Power Cord	6' (1.8 m)

GAS SUPPLY

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

Wolf natural gas ranges will function up to 8,600' (2621 m) in altitude without adjustment. If the installation exceeds this elevation, contact an authorized Wolf dealer for a high altitude conversion kit. LP models do not require conversion.

GAS REQUIREMENTS

Gas Supply	3/4" ID line
Gas Inlet	1/2" NPT female

INSTALLATION

*Without ventilation hood, 42" (1067) minimum clearance countertop to combustible materials, charbroiler and GR488 require non-combustible materials.

NOTE: Shaded area above countertop indicates minimum clearance to combustible surfaces, combustible materials cannot be located within this area.

For island installation, 12" (305) minimum clearance back of range to combustible rear wall above countertop.

OPENING WIDTH	W
30" Range	30" (762)
36" Range	36" (914)
48" Range	48" (1219)
60" Range	60 1/4" (1530)

Induction Ranges

Experience a new way of cooking with a Wolf induction range. Magnetism allows the ultra-fast, energy efficient surface elements to heat up instantly and with perfectly distributed heat. Heat generation stops the instant you turn off the element or remove the pan. The cooktop's surface remains cool. Your kitchen stays cooler too. The electric convection oven with two fans and four heating elements let you select from ten cooking modes and is self-cleaning. Wolf induction ranges are constructed of stainless steel and come in 30" and 36" widths with a tubular handle.

Planning Information

Follow all minimum clearances to combustible surfaces shown in the illustration on the following page.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply flush with the wall or floor and within the shaded area shown in the illustration on the following page. A separate circuit servicing only this appliance is required.

If a power supply cord is used, the cord must be designated for use with ranges and rated for 240 V, 50 amps, and must include 3 or 4 conductors. A 4-conductor cord is required for installations where grounding through the neutral is prohibited.

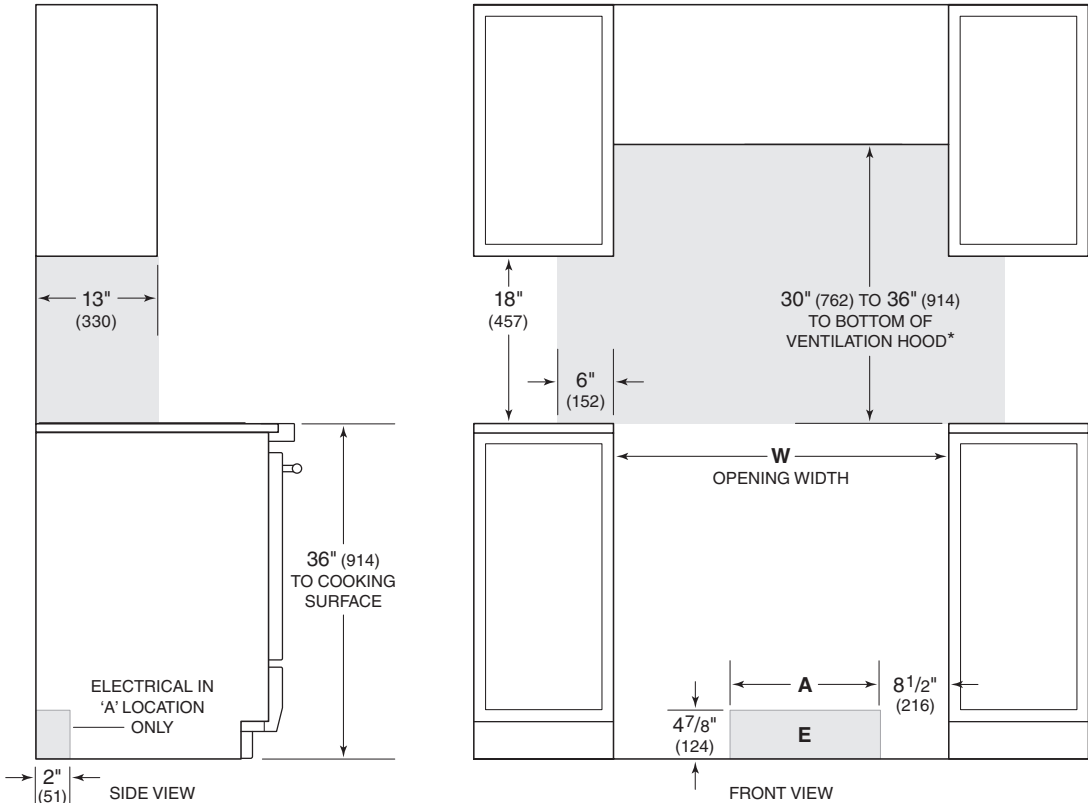

Performance may be compromised if the electrical supply is less than 240 volts.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 240/208 VAC, 60 Hz
Service	50 amp dedicated circuit

Induction Range

INSTALLATION

**Without ventilation hood, 36" (914) minimum clearance countertop to combustible materials.*
NOTE: Shaded area above countertop indicates minimum clearance to combustible surfaces, combustible materials cannot be located within this area.
For island installation, 12" (305) minimum clearance back of range to combustible rear wall above countertop.

OPENING WIDTH	W	A

36" Range	36" (914)	16 1/4" (413)

Sealed Burner Rangetops

Wolf sealed burner rangetops incorporate all the gas cooking features of a Wolf dual fuel range. Customize your rangetop with your preferred combination of burners, infrared griddle, char-broiler, French top, or wok burner. All sealed burner rangetop models are constructed of stainless steel and can be ordered in natural or LP gas.

Planning Information

The platform to support the sealed burner rangetop must include a cutout for electrical and gas supply connections. Refer to the chart below for minimum base support.

When installing against a combustible surface, a minimum 5" (127) riser is required for model SRT366, and a minimum 10" (254) riser is required for 36" and 48" sealed burner rangetops with a charbroiler or griddle. Follow all minimum clearances to combustible surfaces shown in the illustration on the following page. Models SRT362W and SRT484W cannot be installed against a combustible surface.

A Wolf pro ventilation hood is recommended with the sealed burner rangetop. Refer to page 148 for Pro Ventilation.

A downdraft can be used with models SRT304 and SRT366. An accessory trim kit is necessary for this installation. Contact an authorized Wolf dealer for details.

INSTALLATION REQUIREMENTS

Outdoor Grills/Modules

Taste what happens when the heritage of professional cooking moves from the kitchen to the patio. Like their indoor counterparts, Wolf outdoor grills are precision instruments. Constructed of heavy-duty stainless steel, the 30", 36", 42", and 54" grills have powerful burners every five inches for even heat distribution. An electric rotisserie with infrared burner produces succulent poultry and roasts. All grill models can be built in and all except the 54" grill, can be used on a cart for portable convenience. The 25,000 Btu burner module can be built into an outdoor kitchen and the side burner attached to a cart. Wolf grills and modules can be ordered in natural or LP gas.

Planning Information

For portable applications, Wolf grill carts are designed specifically to fit grill models OG30, OG36, and OG42 and the side burner. Model OG54 is designed for built-in applications only.

For built-in applications, Wolf outdoor grills and the burner module are designed for easy placement into a built-in enclosure. For outdoor grills, installation in a combustible enclosure requires an insulating liner. For the burner module, an insulating liner is not required. The enclosure should be built according to specifications for your specific installation on the following pages. If the burner module is installed next to an outdoor grill, a minimum of 12" (305) is required between the units on the rotisserie motor side and 2" (51) on the opposite side. A rotisserie side conversion kit is available from an authorized Wolf dealer.

Model BM13 does not include a tank retention system and cannot be connected to a portable LP tank.

Optional stainless steel accessory doors and drawers are available for built-in applications. Refer to pages 124–128.

Grill carts, insulating liners, and stainless steel doors and drawers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

The electrical outlet must be located within reach of the power cord. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz
Service	15 amp dedicated circuit
Receptacle	3-prong grounding-type, GFCI
Power Cord	6' (1.8 m)

GAS SUPPLY

Installation must comply with all applicable gas codes.

If local codes permit, a certified, 3' (.9 m) long, 1/2" (13) or 3/4" (19) ID flexible metal appliance connector is recommended.

If the outdoor grill is being connected to a whole house LP supply, the LP gas pressure regulator is not provided. It can be purchased from an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

Planning Information

Wolf cooktop ventilation hoods are recommended for use with Wolf induction, electric and gas cooktops, and modules. For ranges and rangetops, a Wolf pro ventilation hood is recommended.

These hoods have a telescopic chimney flue. A flue extension is available through an authorized Wolf dealer.

Installation of the cooktop hood should be 24" (610) to 36" (914) from the bottom of the hood to the countertop.

Wall and island hoods require an internal, in-line, or remote blower assembly, available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. Refer to Ventilation Suggestions on pages 154–157. Cooktop hoods have a vertical discharge with 6" (152) round duct.

Consult a qualified HVAC professional for specific installation and ducting applications.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

For wall hoods, locate the electrical supply within the shaded area shown in the illustration below. For island hoods, locate the electrical supply on the ceiling inside the top of the hood. A separate circuit servicing only this appliance is required.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 110/120 VAC, 60 Hz

36" Hood	35½" (902)	33⅛" (841)
48" Hood	47¼" (1200)	44⅞" (1121)

Planning Information

Installation of the ceiling-mounted hood should be 36" (914) to 84" (2134) from the bottom of the hood to the countertop.

The hood can be operated using the remote control or the control panel located on the right side of the hood.

The hood is shipped without a blower assembly. Internal, in-line, and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. Refer to Ventilation Suggestions on pages 154–157.

Ceiling-mounted hoods include a 6" (152) round discharge for internal blowers and a 10" (254) round discharge for in-line and remote blowers. For an internal blower, the blower box can be rotated to discharge right, left, front, or rear. For an in-line or remote blower, the discharge is vertical only.

Consult a qualified HVAC professional for specific installation and ducting applications.

RECIRCULATING APPLICATION

The ceiling-mounted hood with an internal blower only, can be installed in a recirculating application. The air discharge must be a minimum of 40" (1016) from every side of the hood. Refer to the illustration below. The ductwork and vent cover are not provided. A recirculation kit, available through an authorized Wolf dealer, is required.

Recirculating application

Planning Information

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes. Locate the electrical supply within the shaded area shown in the illustration below. Allow a minimum 12" (305) Romex® wire for connection. A separate circuit servicing only this appliance is required.

Downdraft Ventilation

Constructed of heavy duty stainless steel, the Wolf downdraft rises from the countertop to whisk away odor and smoke into stainless steel, mesh filters and can be lowered beneath the countertop when not in use. Downdrafts integrate perfectly with transitional induction and electric cooktops, gas cooktops, and some modules, they can also be installed with certain sealed burner rangetops.

DOWNDRAFTS

DD30

DD36

DD45

Downdraft Ventilation

DIMENSIONS

NOTE: Shown with front mounted internal blower with 6" (152) round discharge, dashed line represents rear mount.

WIDTH	W	A
DD30	30" (762)	26½" (673)
DD36	36" (914)	32½" (826)
DD45	45" (1143)	38½" (978)

Planning Information

Wolf downdrafts can be installed with most Wolf cooktops, but are not compatible with the grill, steamer, and fryer modules. Downdrafts can be installed with sealed burner rangetop models SRT304 and SRT366.

For installation with a Wolf cooktop, a minimum 25½" (638) deep flat countertop is required.

For installation with a sealed burner rangetop or 30" (762) or 36" (914) contemporary cooktop, an accessory trim kit is required. Contact an authorized Wolf dealer for details. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

The remote-mounted control module can be positioned horizontally or vertically. It must be located within 9' (2.7 m) of the downdraft assembly and a minimum 3" (76) from the edge of the cooktop cutout.

Consult a qualified HVAC professional for specific installation and ducting applications.

BLOWERS

Internal, in-line, and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. Refer to Ventilation Suggestions on pages 154–157.

Internal blowers have a 6" (152) round discharge, can be front or rear mounted, and can be discharged in any direction by rotating the blower box. In-line and remote blowers have a 10" (254) discharge and can be discharged from the front or rear.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following pages. A separate circuit servicing only this appliance is required. A ground fault circuit interrupter (GFCI) is not recommended and may cause interruption of operation.

Certain installations may require the electrical supply be placed in an adjacent cabinet.

Pro Ventilation Hoods

Professional heritage shines through in Wolf professional-style ventilation. Exteriors are heavy-duty, welded stainless steel, so finely hand-finished they appear seamless. Pro hoods are available in a variety of widths. Stainless steel baffle filters and halogen lighting extend the professional look and back it up with pro-level performance. All pro ventilation hoods are crafted of stainless steel. A hood liner is also available for custom applications. The outdoor wall hood is specifically designed for outdoor use.

Planning Information

Pro ventilation hoods and hood liners are recommended for use with all Wolf cooking appliances. Wall hoods should be at least as wide as the cooking surface and island hoods should be 3" (76) wider on each side.

For optimal performance in wall hood applications, a pro 27" deep wall hood is recommended for use with ranges and rangetops with a charbroiler or griddle.

Installation of all Pro hoods except the outdoor wall hood should be 30" (762) to 36" (914) from the bottom of the hood to the countertop. Installation of the outdoor wall hood should be 36" (914) to 42" (1067) from the bottom of the hood to the countertop.

Pro hoods and hood liners are shipped without a blower assembly. Internal, in-line, and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com. The blower will vary in size and is dictated by the cooking unit, volume of air, and length of the duct run. Refer to Ventilation Suggestions on pages 154–157.

Pro hoods accommodate a 10" (254) round duct. Low-profile wall hoods allow for an adjustable discharge. All other pro hoods have a vertical discharge. For the 24" and 27" deep wall hoods, a horizontal discharge kit is available through an authorized Wolf dealer.

Consult a qualified HVAC professional for specific installation and ducting applications.

Optional stainless steel duct covers in a variety of heights are available for pro wall and island hoods through an authorized Wolf dealer.

RECIRCULATING APPLICATION

Low-profile, 24" deep, and 27" deep wall hoods with an internal blower (600 CFM or less), 30" (762) and 36" (914) widths only, can be used in a non-ducted application with a recirculating filter. In this installation, kitchen air is purified through the filters and returned as clean air into the room. A recirculation kit, available through an authorized Wolf dealer, is required.

CUSTOM HOOD APPLICATIONS

Wolf pro hood liners are for use in custom hood applications. The decorative hood can be created out of wood, plaster, tile, or metal. The shape of the hood is not critical, however, the bottom of the hood and liner must be on the same plane. The height of the liner does not need to accommodate the entire height of the decorative hood.

ELECTRICAL REQUIREMENTS

Installation must comply with all applicable electrical codes.

Locate the electrical supply as shown in the illustrations on the following page. A separate circuit servicing only this appliance is required.

For the outdoor wall hood, a ground fault circuit interrupter (GFCI) is required to reduce the risk of electrical shock.

ELECTRICAL REQUIREMENTS

Electrical Supply	grounded, 120 VAC, 60 Hz
Service	15 amp dedicated circuit

Blower Assemblies

For Wolf ventilation hoods and downdrafts that do not include a blower assembly, an internal, in-line, or remote blower assembly must be selected to accommodate the cooking appliance, CFM requirements, and homeowner preferences. Internal, in-line, and remote blowers are available through an authorized Wolf dealer. For local dealer information, visit the find a showroom section of our website, wolfappliance.com.

Ventilation suggestions on the following pages provide Wolf product CFM and blower options for each ventilation hood and downdraft.

Refer to the illustrations below for dimensions of Wolf in-line and remote blowers. Installation instructions shipped with each Wolf ventilation product provide detailed specifications. These instructions can also be found on our website, wolfappliance.com/specs.

Wolf Appliance Residential Limited Warranty

FOR RESIDENTIAL USE

FULL TWO YEAR WARRANTY*

For two years from the date of original installation, this Wolf Appliance product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Wolf Appliance under the above warranty must be performed by Wolf Factory Certified Service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

LIMITED FIVE YEAR WARRANTY

For five years from the date of original installation, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: gas burners (excludes appearance), electric heating elements, blower motors (ventilation hoods), electronic control boards, magnetron tubes and induction generators. If the owner uses Wolf Factory Certified Service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

TERMS APPLICABLE TO EACH WARRANTY

The warranty applies only to products installed for normal residential use. The warranty applies only to products installed in any one of the fifty states of the United States, the District of Columbia or the ten provinces of Canada. This warranty does not cover any parts or labor to correct any defect caused by negligence, accident or improper use, maintenance, installation, service or repair.

THE REMEDIES DESCRIBED ABOVE FOR EACH WARRANTY ARE THE ONLY ONES THAT WOLF APPLIANCE, INC. WILL PROVIDE, EITHER UNDER THIS WARRANTY OR UNDER ANY WARRANTY ARISING BY OPERATION OF LAW. WOLF APPLIANCE, INC. WILL NOT BE RESPONSIBLE FOR ANY CONSEQUENTIAL OR INCIDENTAL DAMAGES ARISING FROM THE BREACH OF THIS WARRANTY OR ANY OTHER WARRANTY, WHETHER EXPRESS, IMPLIED OR STATUTORY.

Some states do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you. This warranty gives you specific legal rights and you may also have other legal rights that vary from state to state.

To receive parts and/or service and the name of Wolf Factory Certified Service nearest you, contact Wolf Appliance, Inc., P.O. Box 44848, Madison, WI 53744; check the Product Support section of our website, wolfappliance.com, email us at customerservice@subzero.com or call 800-222-7820.

*Stainless steel (doors, panels, handles, product frames and interior surfaces) are covered by a limited 60-day parts and labor warranty for cosmetic defects.

*Replacement filters for ventilation hood recirculating kits are not covered by the product warranty.

Wolf Appliance Outdoor Limited Warranty*

FOR RESIDENTIAL USE

FULL ONE YEAR WARRANTY**

For one year from the date of original installation, this Wolf Appliance product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product that proves to be defective in materials or workmanship. All service provided by Wolf Appliance under the above warranty must be performed by Wolf Factory Certified Service, unless otherwise specified by Wolf Appliance, Inc. Service will be provided during normal business hours.

LIMITED FIVE YEAR WARRANTY

For five years from the date of original installation, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: stainless steel briquette trays, gas valves, drip pans, electronic control boards and electric heating elements. If the owner uses Wolf Factory Certified Service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

LIMITED LIFETIME WARRANTY

For the life of the product, Wolf Appliance will repair or replace the following parts that prove to be defective in materials or workmanship: all stainless steel components (excludes surface corrosion, scratches, discoloration, weather and atmospheric related staining and minor surface rust and oxidation). If the owner uses Wolf Factory Certified Service, the service provider will repair or replace these parts with the owner paying for all other costs, including labor. If the owner uses non-certified service, the owner must contact Wolf Appliance, Inc. (using the information below) to receive repaired or replacement parts. Wolf Appliance will not reimburse the owner for parts purchased from non-certified service or other sources.

TERMS APPLICABLE TO EACH WARRANTY

The warranty applies only to products installed for normal residential use. The warranty applies only to products installed in any one of the fifty states of the United States, the District of Columbia or the ten provinces of Canada. This warranty does not cover any parts or labor to correct any defect caused by negligence, accident or improper use, maintenance, installation, service or repair.
