## CoolDrawer™ Multi-Temperature Drawer 3.1 cu.ft

The DCS CoolDrawer™ has been designed to change from refrigerator to freezer at the touch of a button. It is built on the concept of distributed refrigeration, combining ActiveSmart™ technology with a drawer-based design that can be placed anywhere in the kitchen, home or entertainment area. It offers five temperature settings to deliver total flexibility — freezer, chill, refrigerator, pantry and wine modes, merging intelligence with convenience. Stainless steel panel sold separately.

Width	33 11/16"

### Features & Benefits

**Freeze Store Chill**

The DCS CoolDrawer™ multi-temperature drawer has been designed to change from refrigerator to freezer at the touch of a button.

**Freezer Mode**

This mode is ideal for general frozen food storage with the added flexibility of three freezer functions - bottle chill, fast freeze and deep freeze. Freezer Mode is set at 0°F for longer-term storage of frozen items.

**Fridge Mode**

This mode provides the ideal storage for most foods requiring normal refrigeration, such as fruit and vegetables, dairy products, processed meats and drinks. The compact upper storage tray is a perfect place for sensitive foods such as peaches, cherries, cheeses and deli items; the tall bin is ideal for large bottles and containers.

**Chill Mode**

Chill Mode sets the compartment to a temperature perfect for highly perishable meats, poultry and seafood. For these types of food it is ideal to store them at a temperature as close to freezing as possible to retain their vital freshness. Chill Mode sets the compartment at 31°F, just above the freezing temperature for meat.

**Wine Mode**

Using the innovative Wine Mode, connoisseurs can take advantage of special settings that preserve and present wine at its optimum temperature. This mode is ideal for long-term storage of all wine at 54°F and offers two temperature selections for short-term storage.

**Pantry Mode**

This is designed for foods that require a cool, dark place for storage, such as tropical fruits, tomatoes, bananas, bread and cereals. Pantry Mode provides a solution for all those foods that you didn't previously know what to do with and have always resorted to storing on the bench or in the cupboard. This setting offers a stable storage environment at 54°F, making it ideal for sensitive foods.
