THE PATENTED AIRELOOM LIFT™

We've pioneered a natural chamber between the springs and the mattress-top that allows every element to breathe. When the chamber meets the layers of plush material, the bed completely synchronizes with your body. It can only be described as a lift.

Hand tufted design

FABRIC/QUILT

- Ultra-conforming knit with Tencel® and Phase Change Material
- Silk/Wool fibers
- FR fibers
- Super Soft quilting foam
- Plush Convolted foam
- True-Stretch™ cotton backing

TENCEL® PANEL

Our ultra-conforming knit panel is made with breathable Tencel®. This panel is eco-friendly and incredibly soft to the touch.

SILK/WOOL

A breathable blend of natural fibers to provide airflow keeps the body cool and dry for lasting comfort.

ADVANCE MICRO-TOUCH COIL™

This material reduces motion transfer and promotes gentle air flow between the micro-touch-points which in turn, will help with temperature regulation throughout the night.

VISCO FOAM

CertiPur-US certified, it conforms, releases heat rapidly and recovers quickly to its original shape.

TERRAPUR™ LATEX

This hypoallergenic foam has an open cell structure that allows ventilation and even heat distribution.

COTTON

Breathable cotton allows for natural airflow and softness.
