SAMSUNG

51-Bottle Capacity Wine Cooler

Installation Specifications

1. Measure the height, width and depth of the opening, making sure to include baseboards, molding tile, countertop overhang, etc. Check to be sure there is enough room to open the door (consider walls, islands or other obstacles when measuring).

2. Refer to illustration below to determine dimensions.

3. It is not recommended to install the appliance in a corner or directly beside a wall. The door will need to be opened more than 90° to allow full extension of the shelves. If it is necessary to place the unit next to a wall or in a corner, leave at least 3 ¼" of space between the wall and the appliance to allow for the door opening.

4. Allow 1 ⅛" minimum clearance at rear for proper air circulation and electrical connections. Allow ⅛" minimum clearance at each side and top for ease of installation.

The listed depth requirement is assuming that the electrical outlet is located in the adjacent cabinet or flush mounted in the rear wall, not surface mounted inside the enclosure. If the electrical outlet is located inside adjacent cabinet, cut a 1½" diameter hole to admit the power cord. If the cabinet wall is metal, the hole edge must be covered with a bushing or grommet.

Please note: The following dimension and cutout information is for planning purposes only. For complete installation details, consult manual packed with product or download manual online at samsung.com.

Measure height including flooring. Be sure to allow for hinge clearance height if needed.

1½" diameter if electrical outlet in adjacent cabinet

Measure depth including molding or trim.

90°

Measure width

Cooler Capacity: 51 Bottles
• Adjustable Temperature Zone: 41°F–64°F

**51-Bottle Capacity Wine Cooler**

SAMSUNG

MODEL RW51TS338SR DIMENSIONS

Be sure your new Wine Cooler will fit
Don't wait until delivery to be sure your new wine cooler will fit – both in your kitchen and through all doorways. This guide includes all pertinent measurements and clearances so you can buy with confidence.

Counter-Depth Wine Cooler
Counter-depth models sit flush with your kitchen cabinets for a premium, built-in look. They are perfect for galley and island kitchens where space is limited.

Installation clearances
✓ Allow 3¹/₄" of clearance when installing along a wall. This will allow for the door to open 90 degrees without the handle contacting the wall.

✓ Allow 1¹/₁₆" minimum clearance at rear for proper air circulation and electrical connections.

✓ Allow ¹/₈" minimum clearance at each side and top for ease of installation.

For optimal usage and ability to open your wine cooler completely, do not install next to a wall.

Please note: The above dimension and cutout information is for planning purposes only. The measurements in the above diagrams may differ, depending on the measuring method. For complete installation details, consult manual packed with product or download manual online at samsung.com.
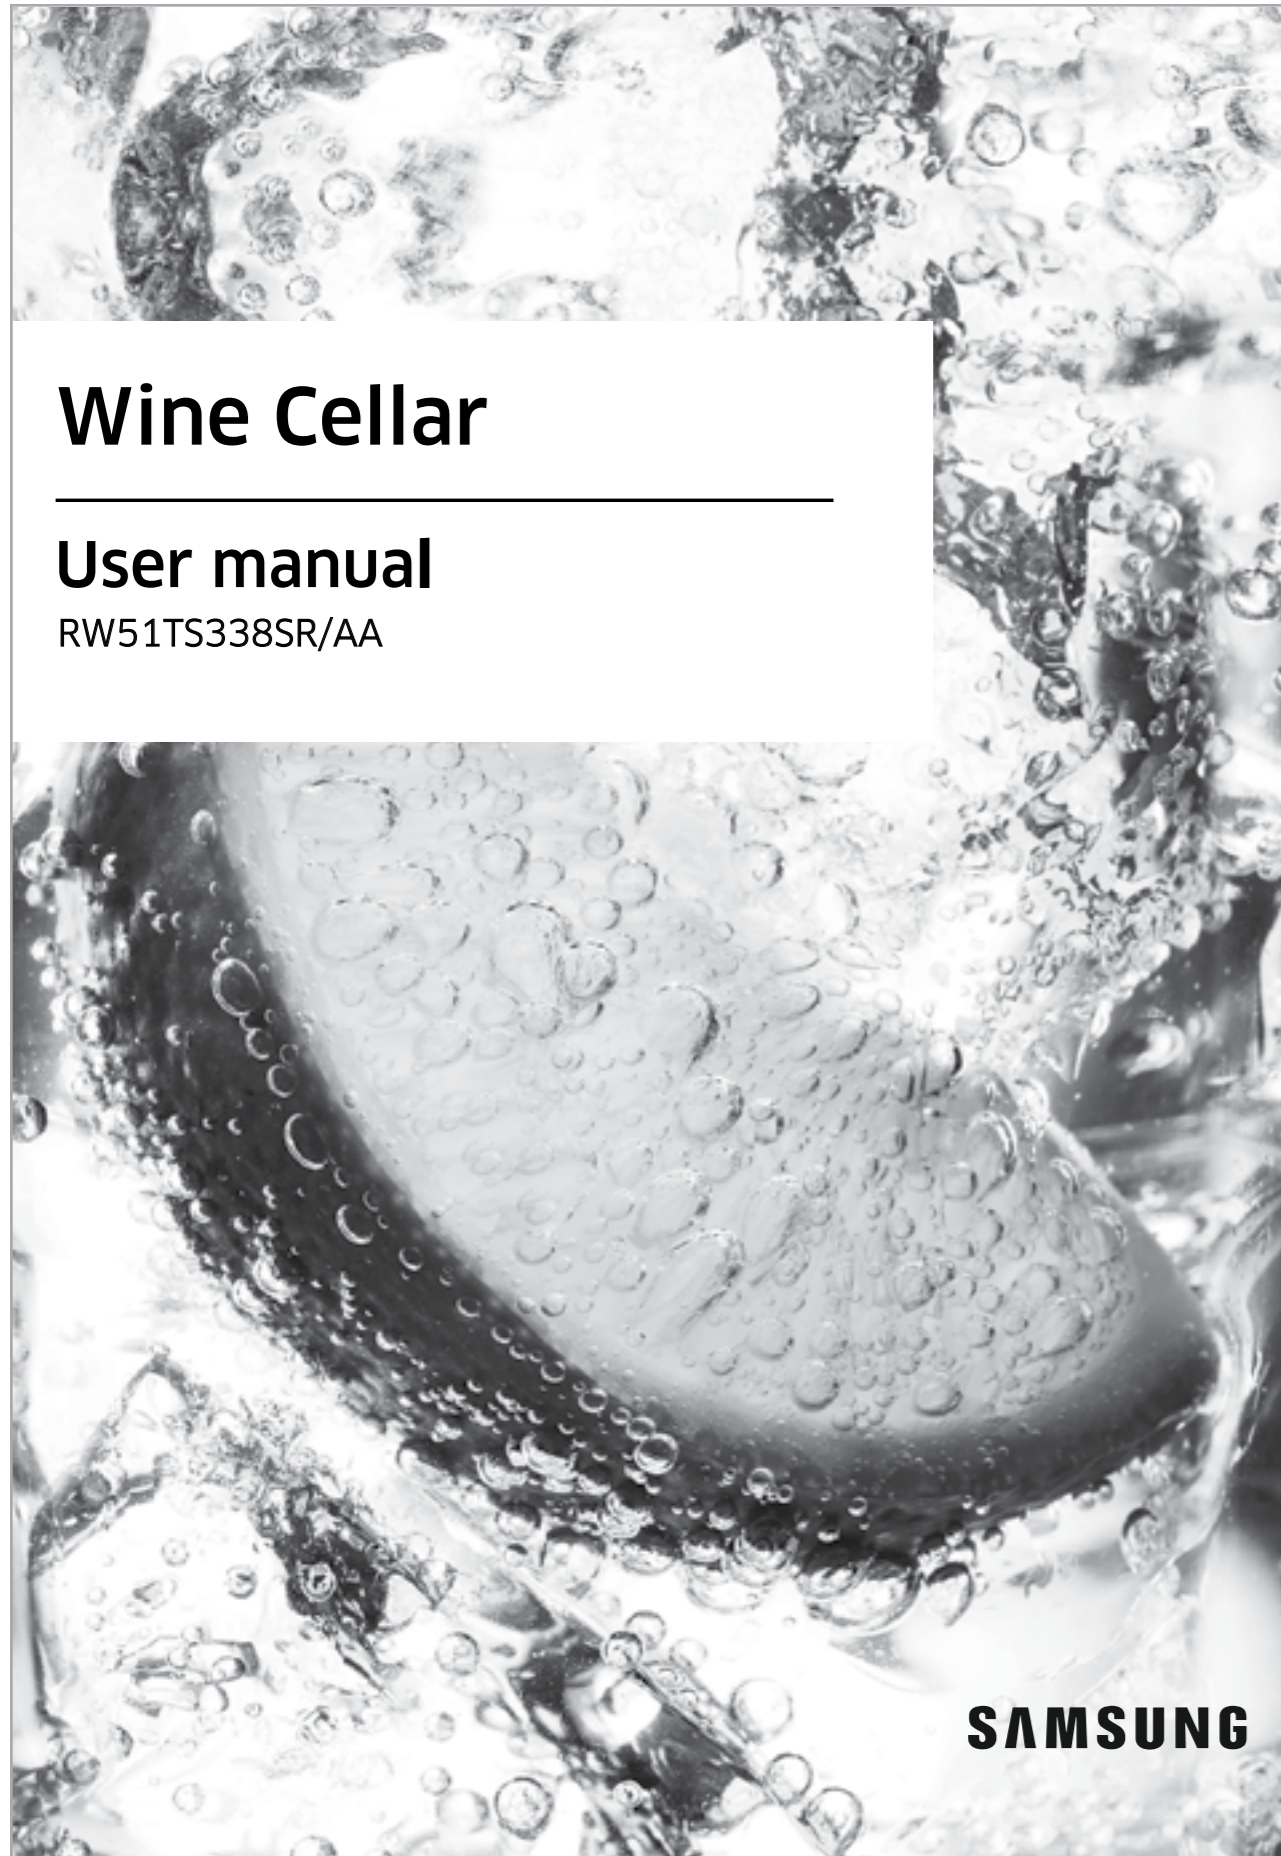

Walk the delivery route
✓ Identify the narrowest opening that the wine cooler will travel, from outside the home to the location where it will be installed.
✓ Wine cooler depth or width must be smaller than the width of the narrowest opening.
