

THEODORE ALEXANDER

Let's Explore 1

D1552S31033-2624

Lets Explore is an accomplished work reminiscent of the innovative art of Swiss-German artist Paul Klee. In this large work on canvas, layered shapes are the focal point. Rectangular linear shapes form a grid while an imperfect circle fills the picture plane. Depth is conveyed through a pale color wash in rose quartz, ecru, sky blue, and cream.

Following Dreaming of Warmer Days, Lets Explore possesses an air of romantic mystique through delicate geometric forms and muted displays of translucent tones. A beautiful work of art on canvas, this abstract painting is an exclusive addition to ART by TA
