

MLILY®

The Harmony Chill 2.0 is a refreshed design of the exceptionally popular Serene Elite model. It has a medium feel that is more supportive than its predecessor, allowing any sleeper to stay comfortable throughout the night.

Cooling Knit Fabric Cover

1.5" Gel AeroFusion™ Memory Foam with PCM Coating

1.5" Gel Memory Foam

10" Flex Support Base Foam

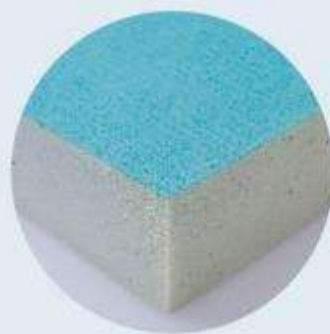

Harmony Chill 2.0

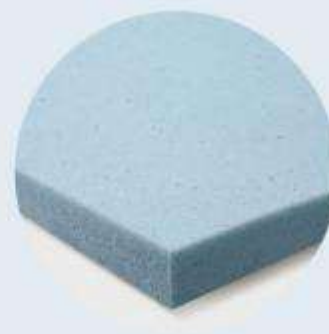

Cooling Knit Fabric Cover

This cover not only breathes, but the air flow creates a cooling sensation keeping you comfortable while you sleep. This highly advanced fabric stays cool-to-the-touch due to its superior breathability and temperature regulating properties that move heat away from the body.

PCM Coating

PCM stands for Phase Changing Material, meaning it can release or absorb body heat to regulate passive temperature while you sleep. Since body temperature lowers to induce sleep and rises to wake you up, this added coating to our specialty foams helps promote a deeper sleep without interruption.

Gel Memory Foam

This memory foam is generously infused with a cooling gel. It keeps all of the favorable properties of memory foam, like contouring and conforming to the sleeper, while mitigating temperature issues with the gel infusion.

Flex Support Foam

Flex Support Foam is often the bottom layer of our mattresses. A mattress must provide the necessary support to keep the spine aligned so the sleeper's muscles relax instead of tightening to compensate. This high-grade foam completes the bottom of the mattress to provide long-lasting durability and support for the top layers.
