UC Certified Business-Grade
Communication

Sennheiser
Signature Sound

The Best of Three Worlds

Disruption-free workspace

With the MB 660's innovative adaptive ANC technology, you are able to take control and stay focused to get the maximum productivity in open office environments.

Communicate and collaborate

Whichever UC environment you choose, MB 660 provides a UC certified, business-grade communication experience.

Experience Sennheiser sound

Create your own sound with a choice of sound effect modes, to get the best personalized sound for speech, music and entertainment. The MB 660 delivers stereo audio, and CD-quality streaming with aptX® in Sennheiser's renowned high-quality, for your ultimate sound experience.

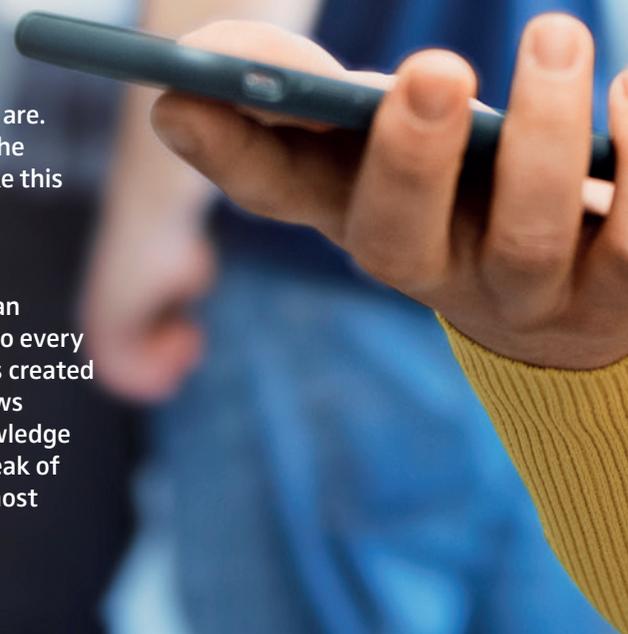

A New Gold Standard in Professional ANC Headsets

Our working environment is changing. As new technology emerges, we find ourselves more connected, and increasingly flexible about where we work. But despite all the expected benefits, open offices, remote working and on-the-go availability haven't always delivered the expected improvements in productivity.

Realizing the full potential of our new working environments requires the ability to maintain

concentration, wherever we are. With the MB 660 you have the technology available to make this a reality.

By drawing on 70 years of audio expertise and taking an uncompromising approach to every single detail, Sennheiser has created a headset solution that allows you, today's ambitious knowledge worker, to perform at the peak of productivity – in even the most distracting environments.

CapTune
YOUR MUSIC. YOUR WAY.

SPEAK FOCUS™

NoiseGard™ hybrid adaptive ANC

By constantly monitoring your background environment for noise, Sennheiser's NoiseGard™ hybrid adaptive ANC technology seamlessly adjusts the level of noise reduction in your headset. This unique technology enables you to take control of your sound environment, so you can have a productive, disruption-free workspace.

TalkThrough

With TalkThrough technology, you have the option of being able to listen to your colleagues or keep an ear open for announcements – without removing your headset.

Advanced Own-Voice-Detector

Sennheiser's Advanced Own-Voice-Detector continuously monitors the environment to determine whether the user's own voice is present or not. When detected, the state-of-the-art system reacts immediately to provide optimal speech intelligibility while at the same time reducing disturbing background noise.

SpeakFocus™ technology

When it comes to business, clear communication is crucial. SpeakFocus™ technology with 3 digital microphones focuses on your voice to deliver crystal clear sound, making it easy for listeners to hear what you're saying – even in noisy environments such as open offices.

WindSafe™ technology

Be sure that your message gets through – even in challenging outdoor environments. WindSafe™ technology and a specially designed wind screen "rosette" reduce wind noise to ensure the clearest possible sound is sent to your listener.

Room Experience™ technology

Sennheiser's Room Experience™ is designed to reduce listener fatigue for all-day users. By externalizing the sound from your head, Room Experience™ gives you the impression that you are having a conversation with a person in the same room. This more realistic sound gives you a more natural and comfortable listening experience during a call.

The Ideal Headset to

Reclaim Your Office

We haven't compromised on a single detail with the MB 660. In addition to taking active noise cancellation to the next level and delivering the renowned Sennheiser signature sound, the MB 660 has been designed to be the ultimate professional business tool for maximizing your productivity.
