Table Top
BE09-DT
Live Edge

Product Specifications

Description

Our American Walnut Live Edge tops feature a beautiful natural grain underneath a bleached color palette. American Walnut is our finest domestic wood species selection. Featuring a Crotch Walnut cut reveals the grain buckle unique to this species and showcases the unique beauty and character of the feathered, irregular grain. Our proprietary bleaching process is both environmentally safe and safe to apply. The white whipping glaze and alcohol based solution is hand-wiped to the natural wood to enhance the individual grain character of each slab of live edge. Our top coat application is a modified conversion varnish to protect and enhance the organic beauty of the solid wood.
