

# User's Guide

## for Dryers

DRY2781N\_SVG

### Original Instructions

Keep These Instructions for Future Reference.

**CAUTION:** Read the instructions before using the machine.

(If this machine changes ownership, this manual must accompany machine.)

## WARNING

 <b>CAUTION</b>	 <b>ATTENTION</b>	 <b>CUIDADO</b>
 A clothes dryer produces combustible lint. To reduce the RISK OF FIRE, dryer MUST BE EXHAUSTED OUTDOORS.	<b>RISQUE D'INCENDIE.</b> Une sècheuse produit de la charpie combustible. <b>LA SÈCHEUSE DOIT ÉVACUER À L'EXTÉRIEUR.</b>	Las secadoras de ropas producen pelusa combustible. Para reducir el RIESGO DE INCENDIO, la VENTILACIÓN DE LA SECADORA DEBE DESCARGAR AL EXTERIOR.
 To reduce the risk of accumulating unsafe concentrations of combustion gasses, the dryer MUST BE EXHAUSTED OUTDOORS.	<b>POUR MODÈLES À GAZ SEULEMENT</b> Pour réduire le risque d'accumulation des gaz de combustion à des concentrations dangereuses, l'évacuation de la sècheuse DOIT S'EFFECTUER VERS L'EXTÉRIEUR.	<b>PARA MODELOS DE GAS</b> Para reducir el riesgo de concentraciones inseguras de gases de combustión, la VENTILACIÓN DE LA SECADORA DEBE DESCARGAR AL EXTERIOR.

500497R7

DRY979N

### CAUTION

A clothes dryer produces combustible lint. To reduce the RISK OF FIRE, dryer MUST BE EXHAUSTED OUTDOORS.

#### FOR GAS MODELS

To reduce the risk of accumulating unsafe concentrations of combustion gasses, the dryer MUST BE EXHAUSTED OUTDOORS.

Hazardous voltage inside. Disconnect power before servicing.

Read all instructions before using unit.

## WARNING

Risk of fire. Highly flammable material.

W881

## WARNING

**FOR YOUR SAFETY**, the information in this manual must be followed to minimize the risk of fire or explosion or to prevent property damage, personal injury or death.

W033

**IMPORTANT:** The electrical installation in the site shall comply with the Australian Electrical Standards, AS3000, SAA wiring rules, and such local regulations that might apply. In Australia and New Zealand, installation must comply with the Gas Installations Standard AS/NZS 5601 Part 1: General Installations.

The maximum washing load (dry weight) shall not exceed 22 pounds [10 kg]. The maximum washing load (dry weight) shall not exceed 23.1 pounds [10.5 kg].

The maximum drying load (dry weight) shall not exceed 20 pounds [9 kg].

## WARNING

- Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.
- **WHAT TO DO IF YOU SMELL GAS:**
  - Do not try to light any appliance.
  - Do not touch any electrical switch; do not use any phone in your building.
  - Clear the room, building or area of all occupants.
  - Immediately call your gas supplier from a neighbor's phone. Follow the gas supplier's instructions.
  - If you cannot reach your gas supplier, call the fire department.
- Installation and service must be performed by a qualified installer, service agency or the gas supplier.

W052

**IMPORTANT:** Purchaser must consult the local gas supplier for suggested instructions to be followed if the dryer user smells gas. The gas utility instructions plus the SAFETY and WARNING note directly above must be posted in a prominent location near the dryer for customer use.

## WARNING

- Installation of unit must be performed by a qualified installer.
- Install clothes dryer according to manufacturer's instructions and local codes.
- **DO NOT** install a clothes dryer with flexible plastic venting materials. If flexible metal (foil type) duct is installed, it must be of a specific type identified by the appliance manufacturer as suitable for use with clothes dryers. Refer to section on connecting exhaust system. Flexible venting materials are known to collapse, be easily crushed, and trap lint. These conditions will obstruct clothes dryer airflow and increase the risk of fire.

W729R1

## WARNING

**To reduce the risk of severe injury or death, follow all installation instructions. Save these instructions.**

W894

## WARNING

### FOR YOUR SAFETY

**Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this or any other appliance.**

W053

This product uses FreeRTOS V7.2.0 ([www.freertos.org](http://www.freertos.org)).

**NOTE:** For Australian models, the energy consumption is measured as used once per week using the Perm Press Automatic cycle with High Temperature and Dryness Dry at the rated load capacity of 20 pounds [9 kg].

The following information applies to the state of Massachusetts, USA.

- This appliance can only be installed by a Massachusetts licensed plumber or gas fitter.
- This appliance must be installed with a 36 inch [910 mm] long flexible gas connector.
- A "T-Handle" type gas shut-off valve must be installed in the gas supply line to this appliance.
- This appliance must not be installed in a bedroom or bathroom.

# Product Registration

New owners of Alliance Laundry Systems equipment are encouraged to register their appliance to insure proper limited warranty coverage. Register online at <http://www.speed-queen.com/home/en-us/support/product-registration.aspx> or contact your dealer to register your appliance. All information will be kept confidential and will not be distributed to other parties.

For Canadian customers, use <http://home.huebsch.com/prod-reg/> to register your product.

# Safety Information

## Explanation of Safety Messages

Precautionary statements (“DANGER,” “WARNING,” and “CAUTION”), followed by specific instructions, are found in this manual and on machine decals. These precautions are intended for the personal safety of the operator, user, servicer, and those maintaining the machine.

	<b>DANGER</b>
Indicates an imminently hazardous situation that, if not avoided, will cause severe personal injury or death.	
	<b>WARNING</b>
Indicates a hazardous situation that, if not avoided, could cause severe personal injury or death.	
	<b>CAUTION</b>
Indicates a hazardous situation that, if not avoided, may cause minor or moderate personal injury or property damage.	

Additional precautionary statements (“IMPORTANT” and “NOTE”) are followed by specific instructions.

**IMPORTANT:** The word “IMPORTANT” is used to inform the reader of specific procedures where minor machine damage will occur if the procedure is not followed.

**NOTE:** The word “NOTE” is used to communicate installation, operation, maintenance or servicing information that is important but not hazard related.

## Important Safety Instructions

### DRYER

Save These Instructions

	<b>WARNING</b>
To reduce the risk of fire, electric shock, serious injury or death to persons when using your dryer, follow these basic precautions:	
W130	

- Read all instructions before using the dryer.
- Install this dryer according to the INSTALLATION INSTRUCTIONS. Refer to the EARTH/GROUND INSTRUCTIONS in the INSTALLATION manual for the proper earth/ground connection of the dryer. All connections for electrical power, earth/ground and gas supply must comply with local codes and be made by licensed personnel when required. Do not do it yourself.
- Do not install or store the dryer where it will be exposed to water and/or weather.
- Do not dry articles that have been previously cleaned in, washed in, soaked in, or spotted with gasoline or machine oils, vegetable or cooking oils, cleaning waxes or chemicals, dry-cleaning solvents, thinner, anything containing chemicals such as in mops and cleaning cloths, or other flammable or explosive substances as they give off vapors that could ignite, explode or cause fabric to catch on fire by itself.
- Do not place items exposed to cooking oils in your dryer. Items contaminated with cooking oils may contribute to a chemical reaction that could cause a load to catch fire. To reduce the risk of fire due to contaminated loads, the final part of a tumble dryer cycle occurs without heat (cool down period). Avoid stopping a tumble dryer before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.
- Items that have been soiled with substances such as cooking oil, acetone, alcohol, petrol, kerosene, spot removers, turpentine, waxes and wax removers, should be washed in hot water with an extra amount of detergent before being dried in the tumble dryer.
- To reduce the risk of fire, DO NOT DRY plastics or articles containing foam or latex rubber or similarly textured rubber-like materials, such as shower caps, water proof textiles, rubber-backed articles, and clothes or pillows filled with foam rubber pads.
- Do not tumble fiberglass curtains and draperies unless the label says it can be done. If they are dried, wipe out the cylinder with a damp cloth to remove particles of fiberglass.
- Do not allow children to play on or in the dryer. Close supervision of children is necessary when the dryer is used near children. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning the use of the appliance by a person responsible for their safety. This is a safety rule for all appliances.
- Cleaning and user maintenance shall not be made by children without supervision.
- Children less than three years should be kept away unless continuously supervised.
- Do not reach into the dryer if the cylinder is revolving.

- Use the dryer only for its intended purpose, drying clothes. ALWAYS follow the fabric care instructions supplied by the garment manufacturer and only use the dryer drum to dry textiles that have been washed in water.
- Always read and follow manufacturer's instructions on packages of laundry and cleaning aids. Heed all warnings or precautions. To reduce the risk of poisoning or chemical burns, keep them out of reach of children at all times (preferably in a locked cabinet).
- Do not use fabric softeners or products to eliminate static unless recommended by the manufacturer of the fabric softener or product.
- Remove laundry immediately after the dryer stops.
- DO NOT operate the dryer if it is smoking, grinding or has missing or broken parts or removed guards and/or panels. DO NOT tamper with the controls or bypass any safety devices.
- DO NOT operate individual units if they have been separated from a stack unit.
- Dryer will not operate with the loading door open. DO NOT bypass the door safety switch by permitting the dryer to operate with the door open. The dryer will stop tumbling when the door is opened. Do not use the dryer if it does not stop tumbling when the door is opened or starts tumbling without pressing the START mechanism. Remove the dryer from use and call the service person.
- ALWAYS clean the lint filter after every load. A layer of lint in the filter reduces drying efficiency and prolongs drying time. Keep area around the exhaust opening and adjacent surrounding area free from the accumulation of lint, dust and dirt. The interior of the dryer and the exhaust duct should be cleaned periodically by qualified service personnel.
- Do not repair or replace any part of the dryer, or attempt any servicing unless specifically recommended in the user-maintenance instructions or in published user-repair instructions that you understand and have the skills to carry out. ALWAYS disconnect the electrical power to the dryer before attempting service. Disconnect the power cord by grasping the plug, not the cord.
- Electric Models: If supply cord is damaged, it must be replaced by a special cord or assembly available from the manufacturer or its service agent.
- Gas Models: If supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
- Before the dryer is removed from service or discarded, remove the door to the drying compartment.
- Failure to install, maintain, and/or operate this machine according to the manufacturer's instructions may result in conditions which can produce bodily injury and/or property damage.

**NOTE: The WARNING and IMPORTANT SAFETY INSTRUCTIONS appearing in this manual are not meant to cover all possible conditions and situations that may occur. Observe and be aware of other labels and precautions that are located on the machine. They are intended to provide instruction for safe use of the machine. Common sense, caution and care must be exercised when installing, maintaining, or operating the dryer.**

Always contact your dealer, distributor, service agent or the manufacturer about any problems or conditions you do not understand.

# Before Drying

## Energy Saving Tips

- Make sure the lint filter is always clean.
- Do not overload the dryer.
- Do not overdry items.
- Remove items to be ironed while still damp.
- Large loads of similar fabrics dry the most efficiently. However, dry permanent press in smaller loads to prevent wrinkling.
- Use the correct cycle for the type of fabric being dried.
- Locate your dryer so the exhaust duct is as short and straight as possible.
- Do not open the door during the drying cycle.
- Plan to do your laundry on low humidity days; your clothes will dry faster.
- Dry multiple loads of clothes one right after another so dryer interior does not have to be reheated for each load.

## Helps and Hints

	<h3>WARNING</h3>
<p><b>To reduce the risk of fire, explosion, serious injury or death, clothes which have traces of any flammable substances such as cooking oil, machine oil, flammable chemicals, thinner, etc. must not be put into the dryer.</b></p> <p style="text-align: right;">W131</p>	

- The directions for installation and proper exhausting are given in the Installation Instructions which are included with the dryer.
- Static electricity may cause garments of synthetic fibers (as in lingerie) to cling together, especially if they are overdried. The use of a liquid fabric softener in the rinse water of the washer, or a fabric softener sheet in the dryer, will soften clothes and reduce static electricity.
- Do not wash or dry clothes that shed lint in the same load with permanent press or knit garments.
- Remove permanent press loads immediately after dryer stops.
- Follow the care labels on FLAME RETARDANT, SCOTCH-GUARD™, etc., garments for proper washing and drying.
- If loads should be damp for ironing, use the Damp Dryness setting, in an Automatic cycle.

## Sort

If you have correctly sorted the items for washing, they should be properly sorted for drying too.

1. Sort by color.
2. Separate lint shedding fabrics and lint receiving fabrics. Towels, flannels, chenille, cottons, rugs, etc., shed lint. Corduroys, knits (including socks), permanent press, and synthetics attract lint.
3. Separate no heat, low heat and high heat items.

In any kind of drying, lightweight fabrics will dry faster than heavyweight fabrics. If mixed loads are dried together (such as sheets and towels), remove the lighter weight fabrics when they are dry to prevent overdrying and wrinkling. The best method is to dry clothes which require the same time, temperature or dryness level in the same load.

## Load

	<h3>WARNING</h3>
<p><b>Do not wash or dry items soiled with vegetable or cooking oils. Some oils may remain after washing and may cause the fabric to catch on fire by itself.</b></p> <p style="text-align: right;">W527</p>	

- Do not overload your dryer. Bulk, not weight, determines the load size. If the dryer is overloaded, it could cause discoloration or permanent heat damage to the load.
- There should be space in the dryer for the clothes to tumble freely and help to reduce wrinkles.
- Large and small pieces together make up loads which will tumble well. Permanent press loads should be smaller to provide room for tumbling. Proper tumbling allows for fewer wrinkles.
- A load can be too small. Just a few small pieces will not tumble properly. They will take longer to dry and they may be wrinkled. For small loads, add a couple of large towels or non lint shedding items to aid in tumbling.
- The following illustrations show the ideal load sizes for fabrics. The average load will fill the cylinder one third to half full when wet.

### Cylinder with wet linens and cottons

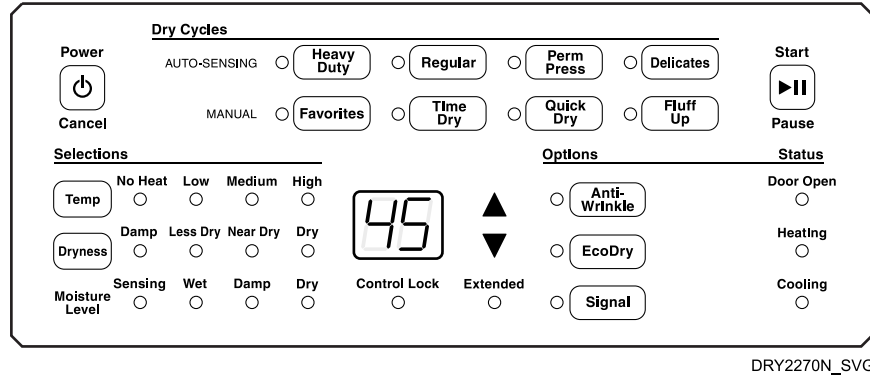

Before Drying

**Cylinder with wet permanent press items**

# Operating Your Dryer

## WARNING

To reduce the risk of fire, electric shock, serious injury or death to persons, read the Safety Information section before operating the dryer.

W520

## Auto-Sensing

The Auto-Sensing drying cycle operation is determined by the type of cycle selected as well as the moisture sensing system, which can be set by changing the Dryness setting. Auto-Sensing cycles are Energy Saver cycles that help prevent over-drying.

When a wet load is put into the dryer it takes a certain amount of time to reach the desired dryness level. The time will vary with load size, type of fabric, amount of moisture in the load, air flow and the laundry room environment. The estimated time will be shown in the digital display.

**NOTE: The time shown before starting the cycle is estimated by averaging the last 5 cycles run on the selected cycle/dryness combination.**

Cycle	Use
Heavy Duty	Dry heavy items such as blankets on this cycle.
Regular	Use for sturdy items like play or work clothes.
Perm Press	Use for permanent press items and synthetics.
Delicates	Dry delicate items on this cycle.

## Manual

There are three manual cycles: Time Dry, Quick Dry and Fluff Up. These cycles will run for the set number of minutes shown on the digital display. The cycle time can be increased or decreased using the up and down arrow keypads. The time and temperature selection may be adjusted manually at any time before or during the cycle.

## Digital Display

The two-digit display is used to show the time remaining in a cycle.

If the cycle time is over 99 minutes the control will display either 1H, 2H, etc., and then the additional minutes over one or two hours.

When the control is powered off, the right-most decimal in the display will flash every one to five minutes to indicate that the machine is in Idle Mode.

The display also shows diagnostic codes.

## Idle Mode

If no keypads have been pressed for five minutes after a cycle is finished, the control will enter Idle Mode. A light in the lower right corner of the digital display will flash every one to five minutes. Press the Power/Cancel keypad to exit this mode and power the display for cycle/option selection. This light will flash again after five minutes when it re-enters Idle Mode.

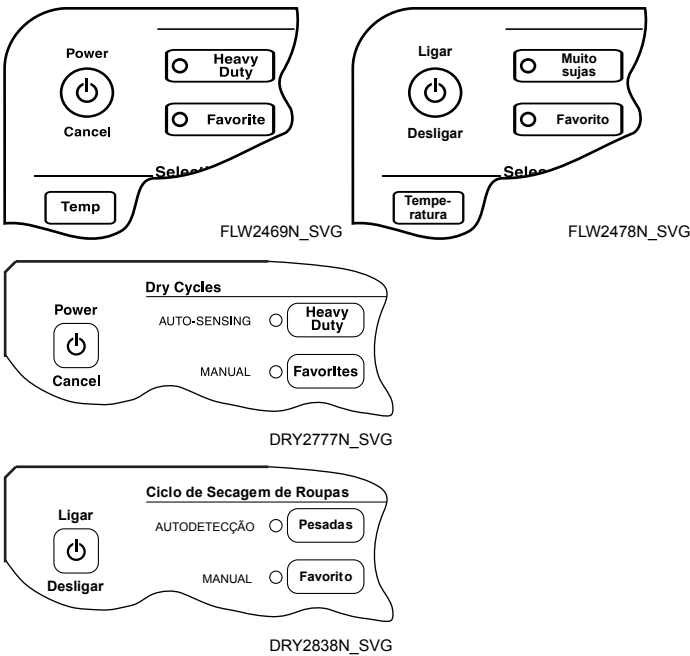

## Cycles

The following cycle descriptions will help determine which cycle to choose depending on the type of laundry being dried. The cycle settings may be modified using the Selections and Options.

Favorite

The Favorite cycle keypad allows the user to save different cycles, selections and options for later use. Nine favorite cycles can be saved.

- 1. Press the Favorite keypad. The control will display the cycle and modifier settings for the first Favorite cycle. The 2-digit display will switch between F1 and the cycle time for the selected cycle.
- 2. Press the keypads for the desired cycle, selection and option settings.
- 3. Press the Favorite keypad to save the settings. The next Favorite cycle, F2, will be displayed. It can be programmed now.
- 4. Press the Start/Pause or Delay Start keypad to save the settings and start the cycle.
- 5. Press the Start/Pause keypad to save the settings and start the cycle.
- 6. Press the Power/Cancel keypad to discard the current settings and exit Favorite mode.

Selections

The following selections can be used to modify the currently chosen cycle. The default selections will be lit after choosing a cycle.

Temp

- Press the Temp keypad to change a Manual cycle's temperature.
- Choose from No Heat, Low, Medium or High.
- Choose from No Heat, Low or High.

Dryness

Press the Dryness keypad to change the dryness level in an Auto-Sensing cycle. Choose from Damp, Less Dry, Near Dry or Dry.

Press the Dryness keypad to change the dryness level in an Auto-Sensing cycle. Choose from Damp, Near Dry or Dry.

Damp	Leaves load slightly damp for easier ironing.
Less Dry	Use for lightweight items such as sheets and shirts.
Near Dry	Use for normal loads.
Dry	Use for heavy items such as blue jeans and blankets.

Over-drying can cause wrinkling, shrinking, excessive lint conditions, and will use more energy than necessary. To increase energy savings and to make sure loads are dried without over-drying, set your Auto-Sensing loads on Near Dry or Less Dry. If items are damp or over-dry at the end of a cycle, increase or decrease the Dryness setting the next time these loads are dried. Remember the settings that work best to get ideal drying results.

Moisture Level

The Moisture Level status lights will be lit during an Auto-Sensing cycle. The Sensing light will be lit at the beginning of the cycle.

The Wet, Damp and Dry lights will be lit based on readings from the moisture sensing system.

The Wet and Dry lights will be lit based on readings from the moisture sensing system.

Options

The following options can be used to modify the currently chosen cycle, signal volume and control lock.

The following options can be used to modify the currently chosen cycle.

Anti-Wrinkle

This option prevents wrinkling by tumbling the clothes load after the end of the cycle every two minutes for up to 60 minutes. The display will show the time remaining. The option will end if the door is opened.

EcoDry

The EcoDry option will reduce total energy consumption by decreasing the temperature of the cycle setting by 10% after the initial temperature setting has been reached.

**Signal (on select models only)**

Pressing the Signal keypad will change the end of cycle signal volume. There are four settings: Off, Low, Medium, High.

If the Anti-Wrinkle option is selected the signal will sound each time the dryer tumbles.

**Control Lock (Secure keypad)**

Pressing and holding the Signal keypad for three seconds will turn on the Control Lock. The Control Lock status light will be lit. While Control Lock is on, no other keypad presses are allowed. Press and hold the Signal keypad again to turn the option off.

## Status

The Status lights are lit during the cycle to show what part of the cycle is running.

Door Open	The Door Open status light is lit any time that the dryer door is open.
Heating	The Heating status light is lit to indicate that a heat portion of the cycle is currently operating.
Cooling	The Cooling status light is lit during the cool-down portion of the cycle.
Extended	The Extended status light is lit during the Anti-Wrinkle cycle extension.

**NOTE: The Heating or Cooling status light flashes (1 second on/1 second off) during the warm-up period. The status light stays lit until the motor starts running.**

## To Dry Clothes

This appliance shall not be used to dry off solvents or dry cleaning fluids. Fabric softeners, or similar products, should be used as specified by the fabric softener instructions.

**IMPORTANT: Refer to the INSTALLATION INSTRUCTIONS before using dryer.**

**IMPORTANT: Before using dryer for the first time, use an all-purpose cleaner or a detergent and water solution and a damp cloth to remove shipping dust from inside of dryer drum.**

**NOTE: This appliance is designed for repeated normal operation according to operating instructions.**

- Sort items into separate loads.

**NOTE: Remove all objects from pockets such as lighters and matches.**

**IMPORTANT: Oil affected items can ignite spontaneously, especially when exposed to heat sources such as in a tumble dryer. The items become warm, causing an oxidation reaction in the oil. Oxidation creates heat. If the heat cannot escape, the items can become hot enough to catch fire. Piling, stacking or storing oil affected items can prevent heat from escaping and so create a fire hazard.**

**NOTE: Remove all sharp objects from laundry to avoid tears and rips to items during normal machine operation.**

- Clean lint filter.

DRY2782N\_SVG1

- Lint Filter

Figure 1

	<b>WARNING</b>
<p><b>To reduce the risk of fire and risk of lint collecting in exhaust duct, do not operate dryer without lint filter in place.</b></p>	
W771	

- Load dryer half full with laundry ( 18 pounds [8.2 kg] ) maximum dry clothes load). Add fabric softener sheet, if desired.

	<b>WARNING</b>
<p><b>To reduce the risk of fire, explosion, serious injury or death, clothes which have traces of any flammable substances such as cooking oil, machine oil, flammable chemicals, thinner, etc. must not be put into the dryer.</b></p>	
W131	

**NOTE: To avoid damage to dryer, do not use more than one fabric softener sheet per load.**

D666I\_SVG

- Close loading door. Dryer will not operate with the door open.

D668IE0A

The drying rack can be used in manual cycles only for no-tumble drying of articles such as tennis shoes, sweaters, stuffed toys or other delicate items.

DRY2332N\_SVG

5. If not already on (control lights will be lit), turn on the dryer by pressing the Power/Cancel button.

**NOTE: You will not be able to press the Start/Pause button to Pause the cycle until the motor is running. If the Start/Pause button is pressed while attempting to run the motor (during the warm-up period), an invalid keypress tone will sound.**

6. Select the Cycle and, if desired, change the Selections and Options settings. Follow garment manufacturer's care labels for recommended temperature settings.
7. Press the Start/Pause button to begin the cycle.

	<h2 style="margin: 0;">WARNING</h2>
<p><b>To prevent the risk of fire, never stop a dryer before the end of the drying cycle unless all items are quickly removed and spread out so that the heat is dissipated.</b></p>	
<p>W756</p>	

**IMPORTANT:** The final part of dryer cycle occurs without heat (cool down cycle) to ensure that items in dryer are left at a temperature that ensures that the items will not be damaged.

**NOTE:** To stop dryer at any time, open the door or press the Start/Pause button. To restart dryer, close door and press the Start/Pause button again.

8. Remove laundry immediately after dryer stops at end of cycle.

DRY2544N\_SVG

## Optional Drying Rack

A drying rack, Part No. D512082, is available at extra cost through your Factory Authorized Service Center.

# Maintenance

## Lubrication

All moving parts are sealed in a permanent supply of lubricant or are equipped with oilless bearings. Additional lubrication will not be necessary.

Do not lubricate the door hinge. If the hinge makes noise, replace the hinge.

## Care of Your Dryer

	<b>WARNING</b>
<p><b>To reduce the risk of an electric shock, serious injury or death, disconnect the electrical service to the dryer before cleaning the interior.</b></p>	
W132	

### Dryer Interior

Wipe the surfaces using a soft cloth and household cleaner or a non-abrasive paste of powdered laundry detergent and hot water, followed by a short heat cycle with a load of rags.

To remove crayon or ball point ink off the dryer drum, put the heat on high and use old rags in the dryer to absorb the crayon or ink. If unsuccessful, contact the appliance dealer. DO NOT use any chemicals in the dryer.

**IMPORTANT: The use of chlorine bleach for removing any discolorations should be avoided because bleach could damage the finish.**

### Cabinet

Wipe the dryer cabinet as needed. If detergent, bleach or other washing products have been spilled on the dryer, wipe immediately. Some products will cause permanent damage if spilled on the cabinet.

### Control Panel

Use only a damp or sudsy cloth for cleaning the control panel. Some spray pretreat products may harm the finish on the control panel. DO NOT use products that contain alcohol on the control panel.

### Exhaust System

	<b>WARNING</b>
<p><b>To reduce the risk of electric shock, disconnect the electrical service to the dryer before cleaning.</b></p>	
W043	

	<b>WARNING</b>
<p><b>Any disassembly requiring the use of tools must be performed by a suitably qualified service person.</b></p>	
W299	

The exhaust duct should be inspected after one year of use and cleaned if necessary by a qualified service person to remove any lint build-up. Inspect and clean exhaust duct every one to two years as required thereafter.

Every two years a qualified service person should remove all front panels and vacuum the inside of the dryer

**NOTE: This recommended maintenance is not covered under the terms of the warranty.**

The weather hood should be checked frequently to make sure the dampers move freely, dampers are not pushed in and that nothing has been set against them.

Keep dryer area clear and free from combustible materials, gasoline and other flammable vapors and liquids.

Do not obstruct the flow of combustion and ventilation air.

**NOTE: Verify proper operation after servicing.**

## Motor Overload Protector

The dryer's motor overload protector stops the motor automatically in the event of an overload. The control's digital display will show "Er", "ro" alternately. After cooling, the overload protector will reset itself.

The control can be cleared by pressing START and the dryer can be restarted by pressing START again. If overload protector cycles again, remove the dryer from use and call the service person to correct the problem.

## Lint Filter

The lint filter is located at the front of the dryer in the lower part of the door opening.

**CLEAN THE LINT FILTER BEFORE DRYING EACH LOAD.**

Annually remove lint filter and screw to vacuum the duct under it.

1. Lint Filter

Figure 2

**IMPORTANT:** The lint filter must be in place in the door opening when using dryer or loading and unloading dryer. If the filter is not in place, clothing could fall into the front air duct and get into the exhaust system, causing damage to the motor.

# Troubleshooting

Try these troubleshooting tips before making a service call.  
They may save you time and money.

Dryer Symptom	Possible Cause/Solution
Dryer won't start	<ul style="list-style-type: none"> <li>• Metered models - Insert coin(s).</li> <li>• Metered models - Activate timer. Push coin slide all the way in.</li> <li>• Insert coin(s) or card, if required.</li> <li>• For dryers equipped with a power cord, make sure the power cord is plugged all the way into the electrical outlet.</li> <li>• Make sure the power cord is plugged all the way into the electrical outlet.</li> <li>• Make sure loading door is closed.</li> <li>• Press START pad.</li> <li>• Press Start/Pause button to start dryer.</li> <li>• Make sure the laundry room fuse(s) isn't blown or loose, or circuit breakers aren't open.</li> <li>• The dryer itself does not have an electrical fuse. An electric dryer has an electrical circuit with two fuses.</li> <li>• Check if motor overload protector has cycled. Wait 10 minutes and try again.</li> <li>• Has the fuse in the gas dryer blown? Refer to Installation manual.</li> </ul>
Dryer won't heat	<ul style="list-style-type: none"> <li>• Metered models - Activate timer. Push coin slide all the way in.</li> <li>• Make sure the laundry room fuse(s) isn't blown or loose, or circuit breakers aren't open.</li> <li>• Electric dryers only – Some homes may have two fuses or circuit breakers for an electric dryer; both fuses or circuit breakers should be checked. Make sure the laundry room fuse(s) isn't blown or loose, or that the circuit breakers aren't open.</li> <li>• The dryer itself does not have an electrical fuse. An electric dryer has an electrical circuit with two fuses.</li> <li>• Make sure controls are in a HEAT setting.</li> <li>• Make sure control is not in Cooling part of cycle, Extended LED is lit, or that the Temp selection is not set to No Heat.</li> <li>• Make sure control is not in Cooling part of cycle or that the Fabric Selector selection is not set to NO HEAT.</li> <li>• Gas dryer only – Make sure equipment and main gas line valve is turned on.</li> <li>• Check exhaust duct to outside to see if it is kinked, blocked or needs cleaning.</li> <li>• Check weather hood to make sure flapper moves freely, has not been pushed in or has not been blocked.</li> <li>• Gas dryer only – Is the limit thermostat open? Reset the thermostat and restart the dryer.</li> </ul>

*Table continues...*

Dryer Symptom	Possible Cause/Solution
Dryer doesn't dry clothes satisfactorily	<ul style="list-style-type: none"> <li>• Check exhaust duct to outside to see if it is kinked, blocked or needs cleaning.</li> <li>• Check weather hood to make sure flapper moves freely, has not been pushed in or has not been blocked.</li> <li>• Auto-Sensing cycle – Adjust Dryness selection.</li> <li>• Manual cycle - Allow more or less time.</li> <li>• Clean the lint filter.</li> <li>• Make sure the load isn't too small. Small loads may not tumble properly or dry evenly.               <ul style="list-style-type: none"> <li>• The Auto-Sensing cycles are not suggested to be used for small loads such as two small towels. For those loads, use the Time Dry cycle.</li> </ul> </li> <li>• Check load being dried. Heavy items dried with lightweight items will not dry as quickly as the rest of the load.</li> <li>• Refer to Sort section for proper sorting information.</li> </ul>
Dryer is noisy	<ul style="list-style-type: none"> <li>• Check dryer for foreign objects (nails, coins, bobby pins, metal, plastic toys, etc.). Remove items from dryer.</li> <li>• Make sure dryer is level. Uneven leveling can cause vibration.</li> <li>• Normal operating sounds include the tick of timer advancing, heat source going on and off, and humming of air moving through the dryer and exhaust system.</li> <li>• Normal operating sounds include the heat source going on and off and the humming of air moving through the dryer and exhaust system.</li> </ul>
Clothes are too wrinkled	<ul style="list-style-type: none"> <li>• Check heat setting. Overdrying can cause wrinkling.</li> <li>• Check load size. Large loads may not tumble properly and may cause wrinkling.</li> </ul>
Clothes have odor	<ul style="list-style-type: none"> <li>• Check room for odors before drying clothes. Any odor (fried foods, paint, varnish, cleaners, burning wood, etc.) will transfer to clothing as the dryer draws air from the room.</li> <li>• Ventilate room before drying clothes.</li> </ul>
Cycle advances too slowly	<ul style="list-style-type: none"> <li>• When in an Auto-Sensing cycle, the time it takes depends on the type and size of the load being dried. When clothing has more moisture, the cycle takes longer than when the clothes are more dry.</li> </ul>
<b>Er, r0</b> on digital display	<ul style="list-style-type: none"> <li>• The dryer's motor overload protector has cycled.</li> <li>• The control can be cleared by pressing the Start/Pause button and the dryer can be restarted by pressing the Start/Pause button again.</li> <li>• If this code is displayed again, remove the dryer from use and call a service person.</li> </ul>

## Warranty Repairs

If something should occur with your washer or dryer that requires service please use the service locator at [www.speed-queen.com](http://www.speed-queen.com).

If something should occur with your washer or dryer that requires service please use the service locator at [home.huebsch.com](http://home.huebsch.com).

## Troubleshooting

We would like to point out items that would not be considered a product failure and are not covered under warranty. If a service technician is called for the items listed below you will be responsible for payment of the service call.

- Plugged or restricted venting
- Kinked venting
- Cleaning lint from within the dryer
- Home electrical issues
- Home gas issues
- Foreign objects found inside the dryer
