Product Description: Designed to pair with the heirloom-inspired Arbor Wing Chair, the Arbor Ottoman delivers an updated look to the timeless wing back chair and ottoman style that has been adored for centuries. Featuring a rectangle shape and tapered wood legs, finish options include Ebony, Perk and Toffee.

Collection Features: Heirloom-inspired and modernly-designed, the Arbor delivers an updated look to the timeless wing back chair and ottoman style that has been adored for centuries. Offered in both a premium upholstery and genuine leather, this chair is sure to create its own moment, no matter where it sits in your home.

Finish: Choice of Ebony, Perk & Toffee finishes

Features: Designed to match the Arbor Wing Chair

Tapered wood legs

Rectangle shape

Material: Leather

Finish Construction: M utilizes a multiple-step finish process of up to 16 finish steps. This results in an unsurpassed clarity, depth and color richness and durability to our finishes. Through hand-craftsmanship such as rubbing and padding, our finishes feel as good as they look, with a smoothness that is delightful to the touch.

Frame Construction: Our M upholstered furniture collection pieces are benchmade from sustainably sourced wood and upholstered start to finish by our skilled craftspeople in both North Carolina and Virginia. Every piece has been thoughtfully designed for today's modern lifestyle. Frames are constructed of sustainably certified kiln dried engineered hardwood. Frame parts are joined with precision cut interlocking joints that are glued, stapled to reduce movement, twisting and warping. Frames have cornerblocks that are glued and screwed at stress points, especially on seat rails and other high stress areas. Depending on rail thickness, frames may be of a hybrid construction, adding a solid hardwood inner frame to give seat rails additional support.

Seat: Poly Seat Cushion - Tight seats: High resiliency plant-based foam with an overlay of polyester fiber.

Leather: Choice of over 30 leathers to choose from including finishes and aniline leather types

Seating Construction: Seat bases are supported by a sinuous arc metal spring construction. Our springs are made from partially recycled content. Due to the design requirements of some styles, rubberized webbing may be used instead of springs. Double rows of springs are used at the corners for extra support. Seat bases are insulated with polypropylene fabric and are padded with synthetic fiber.
