

SPL3C SoundBar

1.5" SHALLOW DEPTH MONO SOUNDBAR

(4) 3.5" (89mm) High Excursion Low-Profile Woofers (1) 1" (25mm) Neodymium Soft Dome Tweeters

The new James SPL3C SoundBar is part of a wide variety of SoundBar designed to deliver excellent sound to any home entertainment system. The SPL3 series features an ultra-thin design at only 1.5" (38mm) total depth to seamlessly integrate with the new series of televisions with less than 2" of screen depth. These new plasma/LED speakers feature James' all new proprietary transducers, delivering maximum performance with elegant design.

Each bar is custom sized to fit each individual TV so the speaker can be seamlessly integrated with the TV. The cabinet design features all aircraft grade aluminum for strength, sonic performance, and suitability for outdoor/marine applications, allowing numerous color options as well. Each SPL3 bar comes equipped with high performance, low distortion woofers and tweeters to provide a high output, wide dispersion of sound across a broad range of frequencies.

The SPL3C is designed as a center channel but can also be used in many other applications as a single speaker. The slim design of this speaker makes it an ideal choice for recessing into an outdoor railing or post to provide integrated and discrete sound in any area. Brackets ordered separately. For outdoor/marine applications, order the SPL3CM.

Size	4 h x Custom Sized w x 1.5 d (in) 101 h x Custom Sized w x 38 d (mm)
Freq Response	90Hz-22 kHz±3dB
Impedance	4 ohms
Sensitivity	86dB 2.83V /1m
