

### Parts

1. 2 Wall Brackets
2. Latex Gloves
3. Screen Cleaner

### External Lens Only - 2.35:1 Projector Throw Distance

To eliminate PIN CUSHION and BARREL DISTORTION with Zero Edge you must follow the information below.

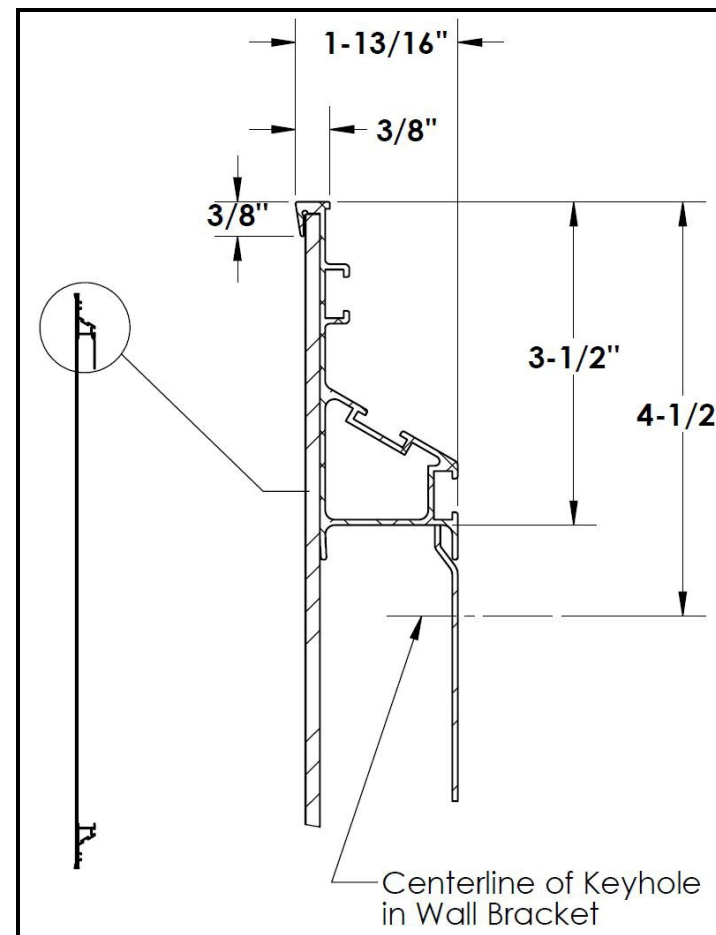

Zero Edge Diagonal Size	Minimum (Throw Distance)	Maximum (Throw Distance)
150"	(22' - 1")	(23' - 0")
133"	(20' - 5")	(21' - 3")
120"	(18' - 5")	(19' - 2")
110"	(16- 10")	(17' - 7")

Important Note: The projector used must have a minimum zoom capability of 2.7  
Projectors with 2.35:1 lens memory modes will have no issues with Zero!

## Pure **ZERO EDGE** - Installation Instructions

### Wall Mount

1. Measure for screen location. Attach brackets to wall using supplied fasteners based on measurements in diagram below. Ensure you hit studs or insert appropriately sized reinforcing hardware.
2. Lift screen onto brackets and slide to center on wall.
3. Remove the pre-mask layer from the screen surface.
4. Enjoy the show.

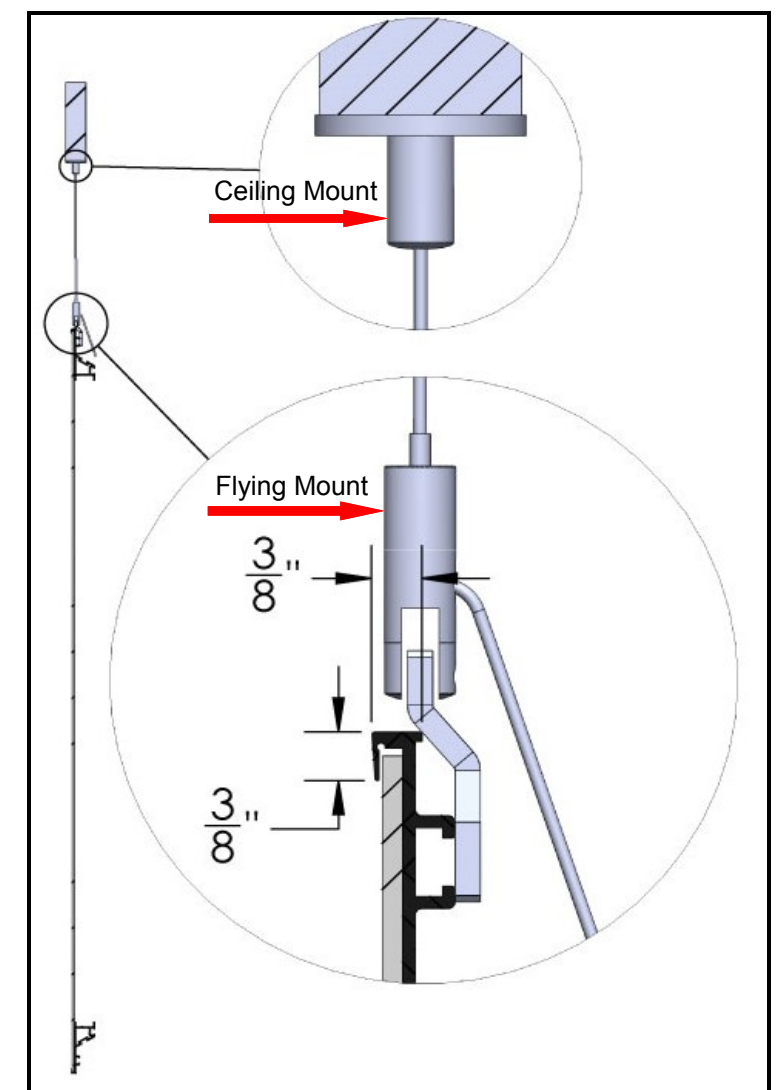

### LED Lighting IR Hex Codes

00	01	02	03
04	05	06	07
08	09	0A	0B
0C	0D	0E	0F
10	11	12	13
14	15	16	17

### Flying Mount

1. Note: Ceiling mounts must be installed such that each will hold at least 100 lbs.
2. Install ceiling mounts at approximately 1/2 screen width apart centered above the viewing area.
3. Slip the cable into the Flying Mount and pull through the slot on the back until the screen hangs at desired height. If you pull too far the screen can be lowered by pushing down the button on the top of the flying mount which allows the cable to be pulled back up through the bracket.
4. We recommend you don't cut the extra cables for future adjustability. Simply tape the extra cable to the back of the screen.
