12 Channel, Class D 70 Watt Digital Amplifier

EA-AMP-12D-70A

DESCRIPTION

The Episode® EA-AMP-12D-70A is an efficient twelve-channel, Class-D amplifier that delivers a powerful 70 WRMS per channel. Perfectly at home in multi-room applications, it features adjustable gain control and bridgeable outputs, with the versatility required for today's sophisticated audio systems.

GEMtech Technology
Features Episode's stringent product design criteria that focuses on energy savings through active energy management circuitry.

Digital Amplification
Up to 80% more energy efficient than traditional analog amplifiers, allowing for a smaller, sleeker chassis.

SPECIFICATIONS

Power Rating (Watts / Channel)	**70 Watts / Channel / 4 Ohms** **50 Watts / Channel / 8 Ohms**
Number of Channels	12
Construction (Digital / Analog)	Digital, Class D
Size (L x W x D)	17" x 4" x 13"
Rack Spacing (1U, 2U, 3U)	2U
Weight	32 lbs.
Ratings / Certifications (UL, CE, Plenum, FCC)	ETL 2000772, CE, FCC Part 15
Power Consumption (G.E.M, Energy Star)	1100W (GEM)

Bridgeable Outputs
Need more power? Bridgeable channels can combine any two channels into a 140W powerhouse, perfect for running multiple standard zones and a single high-powered one.

Gain Controls
Features gain adjustments for each channel pair to independently adjust each audio zone during installation
