RECTANGULAR END TABLE

Astor

In keeping with current design trends, the Astor living room table collection embraces the merger of natural wood stains with clean lines. This approach provides an excellent foundation for adding unique style elements to the piece. In the case of the Astor End Table, a starburst motif is featured on the top and sets the table apart. The starburst design is made using hand-laid thick veneers in three contrasting wood species Oak, Pine, and Walnut. This is then inset with a simple mitered frame for a tray effect. The Astor End Table also includes a lower shelf that adds extra display storage, visual balance, and structural strength.

- Oak, Pine & Walnut Veneers
