NOTES

Upholstery Material: Fabric

Steel seat box

Ten-button wired hand control on the right-hand side of the recliner allows for controlled transitioning between the recline and lift positions.

Pocket on the right-hand side of the lift chair provides storage for the hand control and other belongings.

Battery backup system will activate during a power failure. The backup system is powered by two 9V batteries (not included) that need to be installed into the external transformer.

Removable backs allow for easy lifting and maneuvering through doorways.

Power mechanisms allow you to smoothly recline to any position, adjust the headrest, and adjust the lumbar support.

Ten-button wired hand control on the right-hand side of the recliner allows you to control the reclining, headrest, footrest, and lumbar mechanisms independently. A single USB port is included on the top of the hand control.

A home feature returns the recliner, headrest, backrest, footrest, and lumbar support to their original positions.
