SKU: S917-BR-K3

Availability: Expected Availability Date:

Type: Beds, Panel/Wall Beds

Category: Bedroom

Collection: Seneca

Style: Transitional

Bed Size: King

Finish: Medium Brown

Brand: SLF

Product Description: Thoughtfully crafted Mission style meets transitional design elements to create a fresh look in the Seneca King Panel Bed. Constructed of Cherry Veneers with a classic warm burnished finish, the headboard and footboard showcase a striking slat-on-panel design with details like faux pegs and mortise-and-tenon joinery. Reading lights are integrated into the headboard, offering convenience and ambiance. This piece harmoniously blends traditional craftsmanship with transitional, modern aesthetics.

Collection Features: The Seneca Collection combines mission and transitional design elements to create a fresh look. A warm, burnished finish highlights the natural grain of the Cherry veneers. This collection features a slat on panel design element, mortise and tenon joinery, gallery backs on all the cases, and reading lights in the headboard.

Status: Active

Finish: The Classic Cherry Burnished finish looks elegant and feels inviting to the touch

Features: Combines the simplicity of mission style with a touch of transitional flair
A slat on panel design features vertical slats that create a visually appealing pattern while providing sturdy support
Faux pegs and mortise and tenon joinery add a distinctive touch, creating a sense of handcrafted authenticity
LED reading lights are thoughtfully placed on either side of the headboard, providing focused illumination for bedtime reading

Material: Cherry Veneers

Frame Construction: Samuel Lawrence Furniture uses carefully chosen solid wood and select wood veneers over durable wood products in our furniture construction. Use of veneers enables more decorative looks unattainable with solid wood. Veneers are used over durable wood products such as medium density fiberboard (MDF) and particle board, made of renewable resources. MDF and particle board are used in quality furniture for areas that need to be stable, such as large surfaces. These durable wood products do not expand and contract with heat and cold and do not absorb moisture as much as solid wood, which results in stronger and longer-lasting furniture.
