

CSA-PWS40

Power Pack for Crestron® Shade Interfaces & Roller Shade Motors

The Crestron® CSA-PWS40 is a wall-mounted 40 Watt, 24 Volt regulated power pack that provides power for a Crestron shade interface, model CSC-DCCN or CSC-DCEX (both sold separately).

In addition, the CSA-PWS40 can provide local power for one Crestron roller shade motor, such as the CSM-QMT50 and CSM-QMTDC-256-2, via a direct connection to the motor's pigtail^[1]. This is especially useful in situations where an infiNET EX® wireless network is employed.
