

Live edge desk with file.

The wood used in this desk top is solid Acacia.

The natural and rustic characteristics of this wood includes large knots, splits, big cracks, and color variations which all may change over time.

These are normal occurrences that will not affect the structural integrity of the product.

Due to the very naturalistic and raw state of live edge wood the front drawers and top styles will vary from product to product.

One box drawer and one file drawer are supported with graphite metal legs.

Three flared legs support the open end.

Hardware features graphite finish on steel.

Some assembly required.

Boulder finish.

Seasonal cracks and other natural characteristics will vary from product to product.
