

Shapeshifting audio.

Leon's redesigned Axis AX-61 and AX-81 in-ceiling speakers offer the extreme versatility and high-performance necessary for Living Space Theater applications. These high-fidelity speakers are housed in tuned acoustic suspension cabinets that maintain consistent high-quality sound performance regardless of the environment. To accommodate a wide variety of design aesthetics, each speaker comes with both a round and a square grill which can be custom painted in-house. Available with 6" and 8" drivers and 1" silk-dome pivoting tweeters, Leon's Axis Series allows you to control the direction of the sound and maximize the sonic clarity of any room.

Available with 6" or 8" drivers and 1" **pivoting silk-dome tweeters**

Can be custom painted in-house to match any **wall color or paint code**

Each pair ships with **both a round and a square magnetic grill**

Fully sealed, acoustic suspension enclosure prevents sound from traveling into other rooms

Features Leon's A.R.C. (Acoustic Resonance Control) technology to eliminate unwanted standing waves for **smooth, uniform frequency response**

Can be **custom painted in-house** to match any color swatch or paint sample
