Finishes See Trim Kit Options

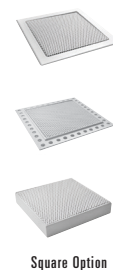

## (1) 5.25" (13 mm) High Excursion Aluminum Woofer (1) 3.5" (89 mm) Aluminum Midrange (1) 0.75" (19 mm) Aluminum Dome Tweeter

This speaker from James Loudspeakers Small Aperture® Series, the 53SA-7, provides high volume levels, deep bass and wide coverage from a small 4" flush and seamless square opening. James SA Series speakers are essentially hidden, yet provide the complete musical experience. Each unit has been engineered to integrate a multitude of designer demands, providing a no compromise design solution for the meticulously artful and audio enthusiast alike.

Designed for high volume playback, the 53SA-7 is ideally suited for home theater or media room applications where critical listening is paramount and aesthetics are equally as vital.

The point source mid/high module provides excellent off-axis response and the hidden mini PowerPipe woofer generates bass down to 50Hz for a truly full-range music experience, yet the user only sees a 4" square or 5" round seamless flush opening. The grille configuration has industry standard mounting and accepts high-end lighting trim kits to allow the speaker to match lighting fixtures in the same installation.

Order woofer assembly, mid-range module and grille kits separately.
