Business Unit: Shenandoah

Type: Chairs, Arm Chairs

Category: Living Room

Collection: Lennon

Motion Type: Swivel

Material: Fabric

Style: Modern/Contemporary

Brand: M

Product Description: Plush and deep-seated, the Lennon Swivel Chair combines a modern design aesthetic with sit-for-awhile comfort. The track-arm style features a plump loose seat and back cushion thoughtfully designed for today's modern lifestyle, especially when you want to swivel to the left or right to engage in a conversation or simply to enjoy the soothing motion. The chair is benchmade from sustainably-sourced wood and upholstered by our skilled craftspeople in North Carolina and Virginia.

Status: Active

Features: Track arm design

Material: Fabric

Frame Construction: Our M upholstered furniture collection pieces are benchmade from sustainably sourced wood and upholstered start to finish by our skilled craftspeople in both North Carolina and Virginia.

Every piece has been thoughtfully designed for today's modern lifestyle. Frames are constructed of sustainably certified kiln dried engineered hardwood. Frame parts are joined with precision cut interlocking joints that are glued, stapled to reduce movement, twisting and warping. Frames have cornerblocks that are glued and screwed at stress points, especially on seat rails and other high stress areas. Depending on rail thickness, frames may be of a hybrid construction, adding a solid hardwood inner frame to give seat rails additional support.

Seat Back: Loose seat back

Seat: Innerspring - High Resiliency plant-based foam core, with coil spring insert for added comfort and longevity. Wrapped with polyester fiber and enclosed in down proof ticking.

Fabric: Choice of over 130 fabrics including a wide selection of performance fabrics

Padding: Padded outside arms and back for smoother surface and neater appearance.

COM Fabric Yardage Required 54-Inch Plain: 9.75

Seating Construction: Seat bases are supported by a sinuous arc metal spring construction. Our springs are made from partially recycled content. Due to the design requirements of some styles, rubberized webbing may be used instead of springs. Double rows of springs are used at the corners for extra support. Seat bases are insulated with polypropylene fabric and are padded with synthetic fiber.
